Round Member Adapters

25666 23162

Stainless steel round member adapters are used to attach standard hanger kits to round tower members, masts, pipes, and other round support structures. Simply feed the round member adapter through the pre-punched slot on standard hanger kits and mount into position. Round member adapters are also known as hose clamps or worm gear.

Monopole Strapping

53693

Secure round member brackets to a monopole or water tank leg with only a wrench or nutdriver. Each half of the bolt/clamp assembly is attached to the ends of a strip of 3/4" strapping. As a nut and bolt draws the two pieces together, the strapping is tightened around the monopole. Much easier to apply than strap with buckles.

Cable Support Rails [439-10]

Square Support Rail

46021

435136

Single Square and Slotted Square Support rails support coaxial cable in indoor and outdoor applications. Both rails consists of twelve gauge steel formed in a square section with lip for spring nut installation. Slotted rails accept standard 3/8" or 10mm hardware and are easily mounted in the field without time consuming modification. Hot dipped galvanized.

T&B Superstrut Metal Framing

Thomas & Betts Superstrut metal framing channel comes in both pre-galvinized and gold galvinized finishes for any framing need. The unique gold galvanized finishe provides for low electrical resistance when grounding of the system is required. Superstrut is also completely compatible and interchangeable with existing strut systems offered by B-Line and Uni-Strut.

readed Rod Support Kits

Threaded Rod Support Kits provide a versatile means to support coax and elliptical waveguide hangers in wireless applications. Commonly used to support trapeeze under waveguide bridge or suspend cable hangers from a ceiling. Each kit comes with a length of stainless steel threaded rod, hex nuts, lock washers and a ceiling mount bracket. Available as a single piece or in packs of five.

PolyPhaser CORPORATION

Protect all equipment connected to coaxial cables at the entrance to yo communication site with PolyPhase coaxial protectors, entrance panels and grounding accessories.

Citel Coax Surge Protectors

62855

The P8AX series coaxial surge protectors are designed to protect PCS systems, antennas, microwaves, broadband applicaitons, two way, cellular and GPS equipment against lightning surges and electrical transients.

- Utilizes gas tube technology
- Bi-Directional
- Moisture resistant

Radiall/Larsen Lightning Protectors

429360 453343 475367

Quarter wave stub technology is based on a three-part coaxial device with N female connectors. When lightning strikes, current is instantaneously diverted to the ground through a short circuit mechanism in the stub. The advantage of this technology are no maintenance required and the lowest residual voltage passes through to the equipment.

General Coverage Bulkhead Mount

67184

Bulkhead mounting coaxial protectors attach through a panel of maximum thickness. Device is DC blocked to stop DC continuity and accommodat equipment types. Handles 50 kA max. surge current. Turn on voltage is a inal 600V for L series models and 1200V for H series. Device turns on 2.5 series) or 7ns (H series) after reaching DC threshold. Multi-strike capabil Aluminum enclosure and stainless steel hardware. Choose the protector has the lowest throughput energy for the desired frequency.

ated Bulkhead Mount

57019

These isolated equipment port coaxial protectors provide the highest level of protection. It features not only a DC block for the center conductor, but also blocks the shield's surge energy from going to your equipment chassis. This prevents ground loops and allows proper single point grounding.

mounting coaxial protectors bolt to a flat surface and require no permanent hole. is DC blocked to stop DC continuity and accommodate all equipment types. Handles max. surge current. Turn on voltage is a nominal 600V. Device turns on 2.5ns after ng DC threshold. Capable of withstanding multiple strikes. Features aluminum enclosure ainless steel hardware. Choose the protector which has the lowest throughput energy desired frequency.

Quarter-Wave Shorted Stub

411372

41215

A quarter-wave device is a short from the coaxial center to the outer conductor. Based on quarter-wave theory, the device operates as a bandpass filter by passing desired frequencies with extremely low return losses (LE 26dB) while shorting all other frequencies, including the range for lightning to ground. These units withstand currents up to 92.9 ka (DIN-type) and 47.9 ka (N-type) at 800 kv. QWS offers optimum, maintenance-free protection.

Quarter-Wave Shorted Stub

16510 90273 44411 54903

Series 3400 protectors consist of a coaxial transmission line & an optimised 1/4 wave shorting stub, which is located between the center conductor and outer conductor. These protectors are designed as coaxial feed-throughs. A V-groove washer made of soft copper ensures that a low contact resistance between connector body and mounting wall is achieved.

Coax Protection, Repl. Gas Capsule [350-11]

If buying these, you might need:

Grounding and Power System Test Equipment . . . . . .page 1462

DC-1 GHz Protectors

Series 3401 protectors consist of a coaxial transmission line which includes a surge arrestor capsule between center and outer conductors. These protectors are designed as coaxial feedthroughs. Bulkhead mounting. The gas capsules are rated by maximum RF power and are purchased separately. The capsules are interchangable without special tools. The protectors are optimised for operation from DC to 1 GHz with N connectors; DC to 300 MHz with UHF connectors.

Tower Top Amplifier Protection [350-18]

GX Series DC Pass Protectors

440389

Designed to protect sensitive Tower Top Electronics, shelter based El ics or active antennas where dc voltage is required, the GX Series is strike capable, fully weatherized and provides the industryos lowest put energy. Engineered for dc voltage applications, the GX Series ini protection at 15% above operating voltage, resulting in extremely lo throughput voltage and throughput energy levels. Applications includ ial cable installations when dc is required to pass through a lightning tion device in route to powering shelter-based Electronics or as a bia when inserting or extracting dc voltages at the equipment level is a r ment.

ector Bulkhead Mount Protector

63437

Protector injects a DC voltage onto the coax to supply or control remote equipment. Typical application is a receive-only site where a tower top preamp requires DC. Mounts through bulkhead panel of max. 1/4" thickness. Handles 18kA surge current. Turns on at 17Vdc, activates 4 ns after reaching DC threshold. Features multi-strike capability, aluminum enclosure, and solid state hardware.

Bulkhead Mount Protectors

98083

Lightning/NEMP protectors operate at microwave frequencies,used in applications such as transmit/receive point to point links and broadcast. Mounts through bulkhead panel of max. 1/4" thickness. DC blocking ensures compatibility with equipment. Handles 20kA surge current. Turns on at 600Vdc, activates 2.5 ns after reaching DC threshold. Features multi-strike capability, aluminum enclosure and stainless steel hardware.

Weatherized GPS/PCS Protection

66312

Wireless communictaions require optimal performance and Polyphaser an innovative product to protect your equipment from lightning surges. MM Series is designed for systems requiring up to 300 watts maximum tinuous power, including in-line amplifiers and GPS receivers. Each unit tested to assure the industry's best VSWR and insertion loss performan the 1.2 to 2.0 GHz passband. The MM series is fully weatherized and is able in serveral Bias-T pass voltages at currents to 2 amps.

ZoneMaster AC Surge Protectors

47144

The ZoneMaster is designed to protect equipment from the most severe transients and is tailored to the needs of the wireless industry for total facility protection.

- Modular design
- Multiple levels of redundancy
- Large block MOV and surface mount SAD technology
- Dual internal thermal & over current fusing
- Status indication of all protection levels
- Remote alarm contacts provided at each module
- Color coded modules
- UL recognized component protection modules
- 10 year warranty
- Competitively priced

Citel Panel Surge Protection

The DS150E AC surge protector has been designed to protect highly exposed sites like cellular and wireless base stations. Each DS150E protects one phase.

- Din rail mountable
- 140kA per phase
- Uses three layers of MOVs
- Remote signalling and visual indicators
- UL1449 and CSA approved
- Instantly self-restoring without power interruption

TRIPP·LITE POWER PROTECTION

Tripp Lite protects your valuable asse with a full line of surge protectors.

TrippLite ISOBAR Rack Mounted

51616

TrippLite ISOBAR industrial rackmount configurations pr against surges, spikes and line noise. They include "cascade cuitry" which offers increasing levels of protection for mo sensitive equipment. ULTRA models feature diagnostic LE provide advance warning of potential power problems bef equipment damage can occur. Isolated filter banks elimina interference between equipment (not DRS1215*). Instant neous surge response is provided with suppression of up 96,000-amp spikes, 1200 joules. All models have a metal h ing , 2 front and 10 rear 5-15R outlets, 15' AC cord and ac able mounting hardware that allows for 19-inch rack, tow stack, wall, or under-counter mounting options. Locking s covers are standard on all models.

T1/E1 Transient Voltage Supressor

93755

T1/E1 standard transient voltage suppressor. Each pair (pin1 & 2 and pins 4 & 5) has 1.5 joules of SAD protection. In addition, each line has a parallel gas tube. Clamping voltage begins at 7 Volts. Each unit is supplied with RJ48C (non-keyed) interface cable and ground conductor. Also accepts RJ11 plugs.

Strike Counters [350-50]

Tower, Pipeline, Down Cond. Counters

Counter displays the number of lightning strikes that ha a system. The counter is for use on tower legs, pipeline other down conductors such as cables. It connects to t points on the conductor, spaced at least 6 feet apart, us #14 or larger wire (not included). Features include test mode, internal protection, and six digit readout. Mount any flat surface. The LSC12 is for outdoor use. The LS for indoor use, and adds a contact closure for local or remote monitoring. To weatherproof, use WK1 (24981) kit.

rance Panel Kits

Complete 12 and 16 unit entrance panel ground kits provide the lowest possible impedance to ground for coaxial ground shields and arrestors by utilizing robust flat ground straps. Unique flat ground strap assembly incorporates 3 low impedance (1/32" x 3") copper straps that are exothermically welded to a 1/4" x 1" copper bar that has a #2 AWG tinned conductor exothermically welded at either end for easy attachment to ground ring.

door Enclosure for Arrestors

4314

When it's necessary to mount lightning arrestors outside, an enclosure might be your best option to keep the arrestors weatherproofed. An internal ground bar can accommodate up to 3 bulkhead lightning arrestors. The box comes with one hole cut for cable coming in and out and a hole in the bottom for ground wire to exit. Holes are supplied with cord grip grommets for weatherproofing. Additional holes must be field drilled. Two additional cord grip grommets are supplied for future expansion. Includes external 4" wide x 8" long ground bar with insulators and wall brackets, 6 AWG jacketed ground jumper with two hole lugs attached and U-bolts for enclosure pole mounting.

T&B GTC Tower Ground Clamps

428321

Thomas & Betts Type GTC Tower Ground Clamps are cast from a high strength corrosion resistant copper alloy and are ideal for reliably connecting ground wire to a flat metal surface or tower footing.

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)
NEW 428321 25 PACK	Thomas and Betts GTC23 2 Year	Two piece clamps for connecting cable to flat metal surfaces on towers. Corrosion resistant copper alloy. 2/0str to #4sol, 1/4" channel thickness	396.50 6.63 3.01	364.78 356.85 348.92
NEW 435327 25 PACK	Thomas and Betts GTC24 2 Year	Two piece clamps for connecting cable to flat metal surfaces on towers. Corrosion resistant copper alloy. 250Kcmil to 2/0str, 1/4" channel thickness	795.50 11 5	731.86 715.95 700.04

Split Bolts

26677

Servit Posts are used to ground one or two cables to steel structures, fence posts or transformers. Also used to tap one or two cables from the bus bar. One wrench installation.

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)
26677 1 EACH	FCI Electrical/ Burndy KC23 1 Year	3/8-16 stud size servit post. Use with #8-#2 stranded or #10-#1 solid cable.	24.50 1 0.45	19.60 18.86 18.25

Halo Standoff Clamps

23186 61579

HARGER Halo standoff clamp. Used for mounting interior halo grounding rings and accommodates up to 2/0 stranded bare conductors. Supplied with two anchors for mounting to masonary and stud walls.

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)
23186 1 EACH	Harger HSC100 1 Year	Holds Halo 1" off the wall	7.80 0.14 0.06	4.61 4.38 4.28
61579 1 EACH	Harger HSC150 1 Year	Holds halo off 1.5" off the wall	15.00 0.03 0.01	8.85 8.42 8.22

Ground Strap [452-22]

pper Grounding Strap

Copper strap will have lower inductance in any application where ground wire is used. On bare mountain tops, the strap's sharp edge will allow a lower voltage side flashing to the bare rock than wire.

Chemical Ground Rods [452-31]

Enhanced Ground Rod Kits

44067

ERICO chemical ground electrodes provide a low-impedance ground in areas of high soil resistivity. Together with backfill material, the electrode system dissipates lightning energy and other dangerous electrical fault currents. 54mm OD Type K copper pipe contains natural electrolytic salts that permeate into the surrounding soil, lowering resistivity. Kits include the electrode, bentonite and GEM backfills and an access well. Easy connection to ground system using the pigtail.

Enhanced Ground Rods.

499022 493021 48587

Enhanced ground rods by Harger contain special s that help lower soil resistivity. A unique design allo the flow of current downward to ground. Hargers Enhanced ground rods are UL Listed and designed over 35 years. If for some reason the salts would be depleted Harger will provide additional salts free o charge. *Other conductor sizes avaliable upon requ Test Well and Enhanced Ground Material available some.

Ground Wire to Ground Rod - One Shots [451-14]

e shot for One Wire to Ground Rod

The Cadweld "One-Shot" Connection is a ceramic disposable unit replacing the familiar semi-permanent graphite mold and associated handle clamp. The "One-Shot" consists of the ceramic mold which contains the weld metal, starting powder, a metal disk, a flared sleeve or sleeves and a cover. Requires T320 Flint Ignitor. FOR CONNECTING ONE WIRE TO ONE ROD.

T&B Weld Metal

417319

T&B Furseweld weld metals are packaged in individual moisture resistant plastic cartridges. The size of weld metal required depends on the exothermic mold being used. All weld metal packs include seperately packaged retaining disks and starting powder for each cartridge. Furseweld weld powders are suitable for making connections from copper to copper and from copper to steel.

220 Volt Switching Power Supply

DuraComm "half rack" power supplies feature Power Bloc switching modules which allows you to increase amperage and/or voltage plus adds N+1 redundancy for system integrity. Typical 80% efficiency produces extremely low heat. ostatically controlled fans provide cooling. Electronic and fuse output protection.

Qty/Uom	Manufacturer Mfg. P/N Warranty	Amperage (Intermittent) Amperage (Cont.)	Input Voltage (VAC) Output Voltage (VDC)	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)

Redundant Power System

The N+1 Redundant Power System provides continuous, trouble-free power for your critical applications. Available with 13.8VDC or 27.6VDC output these units feature:

- edundancy
- 220 VAC manual switch
- swap modules
- status monitoring
- High efficiency
- Double-sided circuit boards
- Precise load sharing
- Redundant o-ring diode

Power Bloc Module

DuraComm Power Bloc Module allows you to add to the RM (not RMF) series of DuraComm power supplies to increase voltage, amperage or N+1 redundancy for system integrity. Can also be used as a stand alone power supply.

- Series/ Parallel Function
- Over Temperature/ Short Circuit/ OverVoltage Protection
- Heat Controlled Fan Cooling
- Approval: UL

Newmar /Power One Rectifiers and Shelves

NHS series telecom rectifiers and NPS power shelves tute a high power, high density, 48VDC or 24VDC pow tem with expandability, N+1 parallel/ redundant config and full hot-swap capability. Each NPS power shelf occ 3U of rack space and accommodates multiple NHS rec Purchase rectifiers and shelves separately.

- High density telecom power -- up to 200 amps (48VDC) or 400 amps (24VDC)
- Positive ground (48V) or negative ground (24V)
- 3U rack space
- Insert /remove rectifiers without system shut-down
- Automatic load current sharing
- Remote activation /shut-down via TTL signal
- Active power factor correction to .99 PF
- Meets UL, CSA TUV specifications

Unity Rectifier and Fuse Distribution

Three rectifiers plus fuse distribution all in 1 rack unit watt rectifier units and fuse panel slide into the unity s Shelf accomodates up to three rectifiers, plus a five-po GMT fuse panel. Purchase rectifiers, shelf, fuse panel an fuses separately

- Slide-in, hot swap architecture, N, N+1, N+2
- Form C output failure contacts for remote alarm
- DC OK/FAIL front panel status indicators
- Front panel voltage test points and adjustment
- Configurable for positive or negative ground
- (1) 1.75" high rack unit, for 19" or 23" wide ra

Power Modules

Power Module may be employed singly or in combination, enabling the installer to scale the system from 500 to 6,000 watts per rack. They function as either a power supply or three stage battery charger for positive, negative or floating grounds. Units may be paralleled for N+1 redundancy. Alarm contacts allow local or remote monitoring. 19" or 23" rack mountable. They can also be intergrated with the PFM-200 Power Function Manager (SKU 475053) with such functions a digital meter output monitoring, multiple load distribution, remote shutdown and low voltage disconnect.

110/220 VAC Switching Power Supply

DuraComm "half rack" power supplies feature Power Bloc switching modules which allows you to increase amperage and/or voltage plus adds N+1 redundancy for system integrity. Typical 80% efficiency produces extremely low heat. Thermostatically controlled fans provide cooling. Electronic and fuse output protection. Switchable volt/ amp meter.

Universal AC Input Power Supplies

DuraComm rack mount power supplies with power factor correction, universal AC input and meters.

- Power Factor Correction
- Voltage/Amperage Meter
- Built-In Remote Control- Turn on/off from remote location
- Built-In Remote Sense- Maintains voltage at load
- Short Circuit/ Over Load/ Over Voltage/ Over Temperature Protection
- In-Rush Current Limiting
- Available Factory Installed Options- Smart Charge System, Float Battery Charging System, Low Voltage Disconnect

Rackmount Power Systems

RPS Series is a fully integrated DC power system with redundant rectifiers, configured for back-up battery installation, to provide fault-tolerant operation in any communication system. System is easily expandable up to 80 amps (48 volt) or 150 amps (24 volt). Battery strings and shelves are optional.

- 19" X 7' Rack
- Ground Bus Bar
- Quick Connect Wiring Harness
- N+1 Redundant Rectifiers
- Power Function Manager

Power Function Manager

Power Function Manager allows you to convert ordinary power supplies (or Newmar Power Modules) into a fully integrated power system with or without batteries. Provides for control, digital output monitoring, paralleling and protection of 12, 24 or 48 VDC positive, negative or floating ground power sources. Features: heavy duty (400 amp) parallel tie point, system status lights, load distribution circuits, low voltage disconnect and summary alarm contacts all combined in a compact, rackmount housing which serves as a master DC power management and distribution center.

2RU Integrated Power System

The IPS is a precision regulated power supply/charger, bac up battery system with multiple metering/status indicator Form C alarm contacts and a low voltage disconnect all i single compact unit which is pre-wired and calibrated for plug-and-play operation. Ideal for customer premises, net-work and telecom applications.

- 2RU (3.5") chassis
- 19' and 23" rack mounting tabs
- AC input circuit breaker
- Forced air cooling
- Internal battery circuit breaker
- Digital ammeter/voltmeter
- LED status indicators
- Auto low voltage or manual battery disconnect
- Built-in batteries
- Remote alarm contacts (rear)
- External battery input terminals (rear)
- External rectifier input terminals (rear)

k Mounted DC Backup W/O Batteries

Astron backups provide the functions of a power supply plus a battery revert with trickle charging circuit. With your batteries, the system keeps the system running even during an AC power failure. (M) series includes voltage and battery meters. (A) series does not include meters. Batteries not included (see section 050/31).

Power System W/O Batteries

New high current switching power system provides N+1 redundancy with provision for uninterrupted DC power with battery back-up. (For use with external batteries).

- dundancy
- back-up option
- D-sub connector for analog signals for indication of volts, amps, module status and ire LED's, AC power failure
- rcuit protection
- Overload current limiting with automatic reset
- Forced air cooling
- BATTERIES NOT INCLUDED

1 DC Power System W/ Backup

SAMLEX N+1 BRM DC Power System features state of the art technology and N+1 redundancy for system integrity. This modular designed switch-mode power supply allows the user to increase amperage in the field from 40A up to 100A. They can also be paralleled up to 200A. Features:

- dundancy
- battery back-up module (max 8 amp charg- rent)
- able up to 100A using Samlex 20A power module (sku 70135)
- nps meter
- Module status and fault indicator LED's and fault alarm
- Short circuit protection and overload current limiting with automatic reset
- D-sub connector for remote analog monitoring
- Half-rack depth, 3.5" height, 19" width

DST Distribution Panel

Distribution panel to control and protect DC system components. Accommodates 10 (DST-10) or 20 (DST-20) plug-in type circuit breakers (not included) which are installed from the front for easy system expansion. Auxiliary contacts on each breaker activate summary alarm contacts providing remote indication of tripped breaker. A special "mid-trip" function distinguishes between an over-current tripped breaker and one that is intentionally shut off. This allows the operator to turn off individual loads withouit setting off the alarm. Wiring is made at easy access, rear panel terminals. 400 amp bus(es) enable simultaneous use of the panel for two different voltages. ORDER PLUG-IN BREAKERS SEPARATELY.

Power Distribution Panels w/ Meters

DuraComm Power distribution panels control and protect DC systems. It provides an economical method of distributing power.

- Voltage/ Amperage Meter for Effective System Monitoring
- 2 Rack Units (3 1/2") in Vertical Height
- Access Power from 8 Outputs, 30A Maximum per Output
- 100A Maximum Per Panel
- Uses automotive ATO blade fuses (not supplied)

If you are buying these, you may need:

Digital Multimeters . . . . . page 14

UL Listed Switching Power Supplies

493116

DuraComm DPS switching power supplies are extremely effi with clean DC output and tight regulation (+/- 1%). Uses 50% electricity than linear type power supplies.

- Filtered and regulated
- Lightweight
- Over temperature protection
- Lower operating costs
- Forced air cooling on all models except DPS-15
- Fused output- ATO fuses
- Battery backup capability with optional IQ-3 mo (SKU 466132)
- Rack mountable with optional SL RACK (SKU 56391)
- UL Listed

Switching Power Supply

35240

ICT Comm Series switching power supplies deliver continuous, trouble free operation and incorporate extra filtering, providing a virtually noisefree environment. Features: low profile, MOSfet design, current limiting, fuse protection, output diode for battery backup, terminal block connector. AX= 5.6" wide, AG= 6.4" wide, A=7.1" wide to match your mobile radio. AM series include a LCD meter.

Switch Mode-Low Profile-UL Approved

68397

DuraComm low profile power supplies feature state of the art Switch Mode Technology. Low noise, low ripple (less than 15mv @ full load), it is designed for today's demanding communications industry. Highly efficient and produces no heat. LP18 and 25 have low noise fans. Internally selected 110/220 VAC input. Mobile radio size footprint.

- LP-10N and LP-14N include a 2 conductor SAE connector on a 3' DC output cord for use with Motorola iDEN and other mobile radios.

Precision Variable Power Supply

46008

Precision power supply has a unique feature to preset the voltage and current without actually loading the unit. Features include: Continuously variable voltage and current with coarse and fine controls, front panel binding posts, automatic overload and short circuit protection, high stability and digital meters. NOT FOR USE IN HIGH RF ENVIRONMENTS.

Industrial/OEM Power Supplies [080-80]

DuraComm Power Block Modules

DuraComm Power Block Modules with power factor correction save 25% of electrical energy costs compared to non-corrected switch mode power supplies and 50% over linear supplies. Reduces wear of components for longer power supply life.

- Power factor correction of 0.98
- Built in in-rush current limiting
- Remote control/ remote sense
- Short circuit / over load / over temperature protection
- Approvals: UL, CUL, CE, and TUV

ery Shelf & Module System

417177

Installing telecom DC power back-up batteries or increasing system capacity has never been easier. The BM Series Battery Module with BMS Shelf provides the complete solution in one plug-and-play reserve power system that features:

- modules that slide into shelf and plug into ver system
- file 2U (3.5") design
- aintenance-free batteries that are IATA T certified for shipment by air
- olarized connector assemblies
- Can be paralleled for increased reserve capacity
- 19"/23" rack mounting brackets provided
- Battery on-line/off-line switch breaker to control output and prevent overload

Tripp Lite SMARTPRO Rackmount UPS

Tripp Lite's SMARTPRO 19" rackmount intelligent line interactive UPS permits interactive control for network servers and telecom systems. Microprocessor controlled unit provides a standard ASCII data stream at a RS232 port, allowing detailed monitoring and control of every UPS function. Features and benefits include Automatic Voltage Regulation, surge suppression and reliable battery backup with 17 front panel LED's showing performance conditions. PowerAlert Software allows enterprise-wide UPS management in a convenient graphical "icon-tree" format compatible with all major operating systems. 2200RM and 3000RM allow you to add external batteries to expand the backup time. 3000RM includes a L5-30P AC input wall plug.

Backups Without Batteries

45582

TrippLite APS units automatically sense and switch AC output be
outside power (utility or generator) and battery power when no
available. Ideal for use as mobile power systems or stationary UP
gency power supplies. Advanced 3-stage chargers provide fast ba
recharge. LEDs monitor battery and load condition. APS models
alternative to gas generators - inexpensive without fumes, fuel, o
Protection against over-charge and over-discharge ensures long
from batteries. High-effeciency output is frequency-controlled to
sensitive loads. Backup time is increased with the number of batt
used. Batteries are sold separately in section (050/31) .

egade

The Renegade Series protects Integrated Access Devices and other customer premise communications equipment from damaging line noise, surges, spikes and brownouts. This advanced technology solution was designed from th e ground up to integrate AC and -48V DC backup into one package, virtually eliminating unnecessary equipment such as stand alone rectifiers and small AC UPS's for routers, hubs and even phone systems. The Renegade is a proven and reliable part of every smooth customer premise operation.

Emergency Backup Relays [442-12]

rgency Relay

Emergency backup relays for DC systems. Used in conjunction with your own power supply and battery bank. When AC power to your power supply fails, the ERC immediately switches over to the bank of batteries. When power is restored, the ERC switches back to the power suply then trickle charges the batteries.

Low Voltage Disconnects [442-27]

Series

Low Voltage Disconnect continually monitors battery voltage then disconnects the load when low voltage point is sensed. Helps extend battery life by preventing over-discharge and prevents radio equipment from operating at potentially hazardous low battery voltages. Disconnect and reconnect are adjustable to meet your system needs and battery requirements. 19"/23" Rack ted Panel.

Battery Chargers For Backup Batteries [442-32]

DuraComm Smart Chargers

412177

DuraComm Smart Chargers are for the charging and maintenance of Deep Cycle or Gel cell batteries. The units offer:

- Optimal method of charging batteries
- Extended battery life
- Monitoring of batteries during charging and maintenance
- LED for charger status
- 110/220 switch selectable
- Battery polarity protection
- Approvals: UL, CUL, CE, and TUV

How Does Solar & Wind Power Work?

Solar and wind power systems can be used independently, or in conjunction, to generate electricity for any wireless site. The generation of solar power uses photovoltaic modules (solar panels) to convert sunlight into electricity. The generation of wind power uses the force of wind to spin a wind turbine, creating friction to generate electricity. Wire then conducts the electricity from the system to the batteries where it is stored until needed.

On the way to the batteries, the electrical current passes through a charge controller (regulator) which will shut off the flow when the batteries become full. For products requiring DC current, electricity can be drawn directly from the batteries. The current must go through an inverter to power products using AC current.

Call or visit www.tessco.com/solar for wind and solar power system-sizing sheets to help in determining the size of system to fit your power requirements.

Applications for Prepackaged Solar and Wind Power Systems

- Telecommunications
- RTU / SCADA Data
- Collection
- Instrumentation
- Navigational Aids
- Flow Monitoring
- UHF / VHF Radio
- Seismic Monitoring
- Tank Gauging
- Radio Telephones
- Railroad Signals
- Cellular Extenders
- Microwave Repeaters
- Wireless Data
- Cathodic Protection
- Irrigation Control

A TP solar system powering a remote valve on an oil pipeline

A prepackaged power-ready solar system supplying electricity to a cell

A custom solar-wind hybrid power system powering remote microwave relay site

Choosing the Right Solar Power System Is as Easy as 1, 2, 3

1. Where is the site located?
2. What is your system's operating voltage?
3. What is your system's power consumption?

Where is the site located?

Find the location of your site. The zones refer to the average amount of sunlight received per day over the course of a full year. Remember, the sun shines for fewer hours in the winter months, so the average is important. The amount of sun received is crucial in determining the size of power system required.

This map is not precise and is designed to serve as a guide for initial system sizing. The site zip code is used during ordering to determine the exact sun exposure of your location.

For Solar and Wind Power sizing sheets, call or visit **www.TESSCO.com/solar**

1.5—1.9 2.0—2.9 3.0—3.9 4.0—4.9 5.0—5.9

Choosing the Right System

1. Use the map to select the insolation zone that corresponds to the equipment site location.

2. Using a solar power system-sizing sheet, determine your site's daily equipment requirement in amp-hours/day at the specified voltage. In the System Selection Table, under your zone column, find the value of the amp-hours/day that is greater than or equal to your load. Based on your system voltage, see the correct part number.

To choose the correct wind power system or solar-wind hybrid power system for your site, fill out a solar power sizing sheet to figure your system requirements. Then call 1-800-TESSCO-1 to talk with a remote power expert.

The System Selection Table is designed as a guide for choosing the proper power-ready system. To ensure proper sizing, please call 1-800-TESSCO-1 and speak with a remote power specialist.

System Selection Table (Figures below are daily load in Amp-hours/day)

Power Ready Systems are available as [TP] pole-mounted control/battery enclosure from 5 to 360 Wp PV array and 38 to 1000 AH battery, or [TG] ground-mounted control/battery enclosure from 150 to 920 Wp PV array and 120 to 900 AH battery.

TESSCO TECHNOLOGIES

Complete Solar Backup Systems [445-70]

If you are buying these, you may need:

Indoor/Outdoor Enclosures . . . . . page 543
Grounding Systems . . . . . page 560

wer Ready Solar System

The Sunwize Power Ready Systems are complete, integrated power supplies designed for loads requiring reliable 12 or 24 VDC. Each system contains the components necessary for safe and reliable power generation without the need and expense of installing a utility hook-up. Power Ready Systems are shipped mostly assembled. Installation is as simple as mounting and connecting two wires. Applications include: SCADA, RTU, Repeaters, Security Lighting and Surveillance

ens solar module

d lead-acid battery for deep cycle charging

ger controller with termperature compensa-

rosion resistant enclosure

nting hardware suitable for outdoor pole nting

- Complete with wiring, safety fuses, and lightning protection
- Options available: low voltage load disconnect, alternate assembly for separate module and enclosure mounting
- TP= Side of pole mounting for solar panel and battery enclosure
- TG= Ground mounting system for solar panels. Pad mountable battery enclosure

SunWize PV Power Stations.

The Sunwize PV Power Station offers the most technically advanced power generation solution avaliable for off grid remote power applications. The system uses PV technology and an engine generator to store energy in a 25 kilowatt hour battery bank. The system can be configured to provide specific voltage or power requirements resulting in a reliable, low enviromental impact, continuous power system. Avaliable in two models, hybrid (with a generator) or stand alone (no generator).

- PV Array uses Siemens Solar modules
- DC Control & Disribution
- System Controller which includes DC-AC inverter,DC controller and Distribution box,AC Distribution box
- Battery Subsystem which includes deepcycle industrial lead-acid batteries
- Engine Generator(PV Hybrid system only)Industrial -grade air-cooled for long life.

Complete Wind Power Systems

The AIR-X and AIR Industrial turbines by Southwest Windpower produce reliable electricity for battery charging even in the most extreme weather conditions. Generating 12, 24, or 48 VDC, this 400 watt turbine is an excellent match for telecom systems, offshore platforms, and remote monitoring systems. Powder coated body, stainless steel hardware, no required maintenance, and 3 year standard warranty makes the AIR Industrial perfect for remote installations. Simple to install on a 1.5" pipe, the turbine connects directly to the battery bank. To create a custom wind/solar hybrid system, please call for assistance.

Complete Wind Power Whisper Systems

The Whisper H40 turbine by Southwest Windpower ha the battery charging for larger remote installations. Gen ing 12,24,36, or 48 VDC, this 900 watt turbine is an exce match for telecom systems, offshore platforms, and rem monitoring systems. Corrosion protected (NAUTICA V SION), no required maintenance, and a 2 year standard ranty ensure performance. The turbine is CE approved comes with the EZ wire II charge controller and a diver load for when the batteries are fully charged. Simple to on a 2.5" pipe. To create a custom wind/solar hybrid system, please call for assistance.

Shell Solar Modules

Shell Solar Modules feature high efficiency single crystal solar cells offering superior low light level performance, formance warranty and the most energy per watt of any commercially available technology. All Shell Solar module carry the following certifications: UL-1703, MIL 810, JPL- CE mark, FM, ISO 9001 (SSI).

Astropower Solar Modules deliver top quality performance for all photovoltaic applications including rural electrification, water pumping, telemetry, communications, and general battery charging. Ideal for Installations up to 600VDC, Astropower modules can be used in single module and multiple module systems.

Solar Module Mounts [445-20]

SunWize Module Ground/Roof Mounts.

SunWize mounting hardware is designed to withstand heavy wind loading. Ground/Roof mounts resemble an A frame and can accomodate from 1 to 12 panels. They are perfect for ground, roof and vertical surface mounting. Also available in aluminum. Additional mounts are available for all other solar panels.

SunWize Solar Module Mounts.

SunWize Side-of-Pole racks are used to mount 1-4 panels to different sized poles. Pole size is determined by the number of modules to be mounted. Mounts to pole via hose clamps or U-bolts (sold seperately). Mounts can be adjusted to optimal sun angle. Galvanized steel construction. Mounts for other Solar panels are available.

SunWize Hybrid Controllers

The controller features full protective functions for overcharge, low SOC, overcurrent, overvoltage and overtemperature. Status LEDs display battery charge state and system status. The new algorithm utilizes voltage, temp.,and amp hour measurements to enable an accurate determination of the battery state of charge(SOC),the most critical system parameter. The self-learning algorithm automatically adjusts for capacity and age of the battery. *Avaliable options:LCD volt/amp charge meter.

SunWize Controllers

20855

This series of controller is an economical pulse-width modulated shun controller designed for small and mid-sized systems. The full featured includes temperature compensation charging, MOSFET transistors for overdischarge protection, and a user-selectable auto- equalize algorithm Standard features include overvoltage protection, status LED for batte voltage, and a built-in battery fuse. Optional LEDs for charging function load disconnect are available.

Morningstar SunSaver Controllers

The Morningstar Sunsaver controllers standard features include 100% solid state, marine rated terminal and anod case, epoxy encapsulated eletronics, temperature compe sated charging, charging LED and LVD indicator (with LV option). Selectable sealed or flooded battery charging an PWM charging. LVD set at 11.5VDC reconnect 12.6VD 12 volt and 23VDC and 25.2 on 24VDC units. The SunSa carry the CE mark, UL 1604 approved.

- PWM Battery Charging
- 100% solid state
- Fully encapsulated in epoxy potting
- Temperature compensation
- Sealed/Flooded battery select
- Green charging/Red LVD indicators

rningstar ProStar Controllers

The Morningstar Prostar controllers have a long list of standard features, they are available in 15 or 30 amps and 12/24 or 48 VDC. Three types of batteries can be charged sealed, gel or flooded. Other features include temperature compensated charging, 100% solid state, LED's indicate battery status. The control board is conformal coated all fasteners are stainless steel. All Prostar have Low voltage Disconnect (LVD), electronic protection against reverse polarity, reverse current at night high voltage disconnect and high temperature nnect, lightning and transient surge protection.

able in 15 or 30 amp
nated life is 15 years
% solid state

- Very low voltage drops
- Capable of 25% overloads

Inverters [445-40]

ce Modified Sine Wave Inverters

Trace Inverters are known around the world for dependable performance due to sound circuit design, an unusually large complement of electronic power devices and 100% testing. Trace UX series are compact inverters that will produce up to 1400 watts and can handle loads that surge to three times that level (will hold surge load for nearly a minute). Includes a built in 25 amp battery charger.

Battery Chargers [445-60]

Solar Systems Battery Chargers.

The DLS Series Charger/Power Supply uses switch-mode technology to insure service free operation even when su jected to extremely harsh conditions. The clean DC outpu operates radios and televisions without causing annoying static or snow. They feature regulated converter/power su ply, tight line-load regulation, two-step voltage switch, curr limiting, transient voltage protection and short circuit/over current protection. The DLS maintains the batteries, only putting into the battery what is required by load or self-discharge, cutting back to milliamps as the battery requires.

Design

The 25G tower is a general purpose communications or heavy-duty TV tower which satisfies a wide range of needs. It meets the approved national standard ANSI/EIA-222-D.

Construction and Finish

The 25G 12-1/2-inch equilateral triangular design, with continuous steel zig-zag cross-bracing, is electrically welded and fabricated in precision equipment. The extra-heavy-duty 1-1/4-inch steel tubing side rails, continuous solid-steel rod bracing, and eight zig-zag braces per 10-foot section create an extraordinarily rugged structure. The 25G can be self-supporting, provided a house bracket is used. Under normal conditions, the 25G can rise 35 feet above the bracket or 190 feet when guyed.

Sections and all accessories are hot-dipped galvanized, inside and out, after fabrication, to protect all points of welding against corrosion and to provide an attractive and maintenance-free installation.

Kit Components

All items necessary for a complete, grounded, guyed tower are included in the TESSCO part number shown for the desired wind speed rating and tower height. Included are tower sections, top section, concrete base plate, pier pin, guy brackets, guy wire, big grips, rope thimbles, eye and eye turnbuckles, eye and jaw turnbuckles, safety kit, anchor rods, anchor ground kit, base ground kit, and installation instructions.

Call 800-472-7373 for guying details.

280'	43072	—	—
290'	43075	—	—
300'	55394	—	—

Design

The 45G is a true multi-use structure for applications up to 300 feet. It satisfies a wide variety of needs under varied conditions and meets approved National Standard ANSI/EIA-222-E.

Construction and Finish

The 45G tower section is constructed on an 18-inch equilateral triangle pattern, using 1-1/4-inch, 14 gauge, special quality steel tubing or solid steel rod legs. The zig-zag cross-bracing is formed from a continuous 7/16-inch solid-steel rod electrically welded every 15-3/4 inches on the side rails. Each 10-foot section is sleeve-joined to the other and double-bolted to provide superior strength.

Sections and accessories are hot-dipped galvanized, inside and out, after fabrication to protect all point of welding against corrosion and to provide an attractive and maintenance-free installation.

Kit Components

All items necessary for a complete, grounded, guyed tower are included in the TESSCO part number shown for the desired wind speed rating and tower height. Included are tower sections, top section, concrete base plate, pier pin, side arms, guy brackets, guy wire, big grips, rope thimbles, eye and eye turnbuckles, eye and jaw turnbuckles, safety kit, anchor rods, anchor ground kit, base ground kit, and installation instructions.

Design

The 55G tower provides excellent strength in heights to 400 feet. Because of its rugged design, the 55G satisfies a broad range of communication uses, particularly where unusual windloading and height requirements exist, and meets approved National Standard ANSI/EIA-222-E.

Construction and Finish

The 55G tower section is constructed on an 18-1/2-inch equilateral triangle pattern, using 1-1/2-inch high-strength tubing for the side rails. The zig-zag cross-bracing is formed from a continuous 7/16-inch solid steel rod electrically welded every 15-3/4 inches on the side rails. Each 10-foot section is sleeve-joined to the other and double-bolted to provide superior strength.

All parts are hot-dipped galvanized, inside and out, after fabrication, to protect all welding points against corrosion and provide a maintenance-free installation.

Kit Components

All items necessary for a complete, grounded, guyed tower are included in the TESSCO part number shown for the desired wind speed rating and tower height. Included are tower sections, top section, concrete base plate, pier pin, side arms, guy brackets, guy wire, big grips, rope thimbles, eye and eye turnbuckles, eye and jaw turnbuckles, safety kit, anchor rods, anchor ground kit, base ground kit, and installation instructions.

Design

The Titan 1500 guyed towers are general-purpose communications, mobile radio, low-power TV, cellular/PCS, or telemetry towers which satisfy a variety of needs for applications from 32 to160 feet.

They are built on a 15-inch equilateral triangular design with preassembled cross-bracing. Each 8-foot section features six preassembled diagonal cross-braces that are bolted securely.

Construction and Finish

The Titan 1500 series of towers is sturdy and easy to install. Tower legs are bound with a rounded brace that tightly secures all three faces of the tower section. The eight-foot modular sections are quickly assembled with the supplied splice hardware. Also featured is a unique guy anchor rod with five holes to accommodate any application regardless of tower height.

All Titan 1500 towers have a galvanized finish on all tower members and pin base assembly to provide years of rust-free use.

Kit Components

All items necessary for a complete grounded, guyed tower are included in the TESSCO part number shown for a 100-MPH wind speed rating and the desired tower height. Included are regular sections, guyed sections, top section, pin base assembly, guy wire, ground kit, guy grips, shackles, jaw and eye thimbles, thimbles, and guy anchor rod.

T-200 Self Supporting Towers

Every tower is different. That's why Titan Towers are designed in easy to assemble pre-engineered 8' sections. This allows you to match your height and load requirements to your area. The result is a safe, reliable, affordable tower that will give years of maintenance free service. The T-200 series should be used in 70 MPH wind areas only with a maximum wind load of 15 sq.ft. round member/ 9 sq.ft. flat plate equivilent.

crete Base Sections

Trylon 4' tall concrete base section acts as a "template" and allows the base to be poured without having to attach the bottom 8 foot section. As a result, you can set this 4 foot short foundation section in the hole, make sure that it's level and then proceed to pour the concrete. Use this section instead of the stub legs that come with the tower.

Rohn 25G Towers

General purpose communications, or heavy duty TV tower. The 25G 12-1/2 inch equilateral triangle design, with continuous zig-zag cross bracing, is electronically welded. The heavy duty 1-1/4 inch steel tubing side rails, continuous solid rod bracing, and eight zig-zag braces per 10 foot section create a rugged structure.

- Meets ANSI/EIA-222-D
- 12-1/2" triangle design
- 1-1/4" steel tubing side rails
- Can be self supporting if "house bracket" is used
- Can rise 35 feet above the bracket (in normal conditions)
- Up to 190 feet if guyed
- All sections are hot dip galvanized, inside and out

Rohn 45G Towers

Multi-use structure for applications to 300 feet. The 45G 18 inch equilateral triangle design, with continuous zig-zag cross bracing, is electronically welded. The heavy duty 1-1/4 inch steel tubing side rails, continuous solid rod bracing, and eight zig-zag braces per 10 foot section create a rugged structure. Each section is sleeve joined with two bolts for strength.

- Meets ANSI/EIA-222-D
- 18" triangle design
- 1-1/4" steel tubing side rails
- Up to 300 feet (guyed)
- All sections are hot dip galvanized, inside and out

The heavy duty 1-1/2 inch steel tubing side rails, continuous solid rod bracing, and eight zig-zag braces per 10 foot section create a rugged structure. Each section is sleeve joined with two bolts for strength.

- Meets ANSI/EIA-222-D
- 18-1/2" triangle design
- 1-1/2" steel tubing side rails
- Up to 400 feet (guyed)
- All sections are hot dip galvanized, inside and out

Tower Lighting Products [450-22]

Replacement Bulb

TESSCO inventories both standard replacement tower lighting bulbs as well as long lasting Weatherex tower lighting bulbs. Pyrex glass is used in the manufacture of the Weatherex bulbs. This helps to eliminate premature burnouts due to glass cracking when moisture develops due to extreme temperture changes.

TESSCO #	DESCRIPTION	QTY

Get yours today!
Check below to receive your *complimentary* TESSCO Knowledge Tools.

☐ **The TESSCO® Solutions Guide**

The *TESSCO Solutions Guide* replaces hundreds of manufacturer's catalogs with a single, comprehensive reference that's the standard for the wireless industry.

☐ **The Wireless Journal®**

TESSCO's informative quarterly news and product magazine features three market-focused sections with news and product information tailored to your specific interests.

☐ **The TESSCO Transmitter®**

Valuable product, industry and supply chain knowledge delivered directly to your e-mail box every month.

☐ **Your Total Source® Bulletins**

Fast, complete information on thousands of essential products via mail or fax. Dial our T-Fax line at 410-229-1650 or visit our Web site for more information.

☐ **FREE supply chain consultation**

Please call me to discuss how TESSCO's supply chain solutions can help streamline my business.

☐ **Annual Report & Investor Packet**

Get an insider's perspective on TESSCO's unique business philosophy and strong operating platform.

☐ **E-mail me with the latest product and solutions news.**

TESSCO TECHNOLOGIES®

A **World-Class** Choice from **TESSCO**

PolyPhaser®
CORPORATION

Global Lightning Solutions

INNOVATIVE LIGHTNING PROTECTION from **PolyPhaser** is now available in a unique patented design. The SX Series is dc blocked for ultimate equipment protection, is maintenance free, and is recommended for single or multi-channel transmitters as well as receivers. Comprehensive testing and field applications are proof positive that *PolyPhaser's SX Series provides the industry with the most absolute RF and surge protection available.*

Applications:

- PCS
- Satellite
- Broadcasting
- Cellular
- Microwave
- Military
- GPS, GSM, WLL
- Land Mobile Radio
- LMDS
- Paging

A **World-Class** Choice from TESSCO

From home offices to corporate offices,
CSI has your in-building wireless needs covered.

New Products

Small Office/Home Office Solution
Model 150 PCS Bi-directional Amplifier – Featuring 50 dB of gain and covering the entire PCS frequency range, the 150 is the perfect solution for small office/home office installations.

Large Facility Solution
Model 610 Bi-directional Amplifier – With 80 dB of gain and nearly two watts of linear output power, the 610 is a high-performance BDA ideal for applications requiring high gain due to low outside signal strength and for driving extensive coaxial systems.

With over 7,500 amplifier units sold, CSI has become a leading provider of technologies that effectively extend wireless signals in all types of facilities. From small offices to multi-story commercial facilities, and everything in between, we're experts at providing high performance products and services that define a new level of value in the wireless industry.

Wherever you need to enhance in-building wireless communications, count on CSI products to cover you.

Turn to the manufacturers index for a complete list of CSI products or call your TESSCO distributor for more information.

Protect It! Surge Protectors

430193 483195 456162 463149

The Protect It surge protector series provides guaranteed surge protection for virtually any application. Advanced in design yet inexpensive the Protect It models are a cost effective wa to protect your investment in electronic equipment.

- Typically feature 6, 7, or 8 AC outlets and accommodate up to 3 transformers without blocking outlets
- Handle the strongest surges, spikes, and line noise
- Have Up to 15 ft power cords, some with space-saving right angle plugs
- Diagnostic LED's reveals the presence and status o incoming utility power and confirm properly wire safety ground
- Rear keyholes allow mounting to walls or desks

Tripp Lite SMARTPRO UPS Systems

Tripp Lite's SMARTPRO intelligent line interactive UPS permits interactive control for network servers and telecom systems. Microprocessor controlled unit provides a standard ASCII data stream at a RS232 port, allowing detailed monitoring and control of every UPS function. Features and benefits include Automatic Voltage Regulation, surge suppression and reliable battery backup with 17 front panel LED's showing performance conditions. PowerAlert Software allows enterprise-wide UPS management in a convenient graphical "icon-tree" format compatible with all major operating systems. 2200NET and 3000NET allow you to add external batteries to expand the backup time. 3000NET includes an L5-30P AC input wall plug.

Matrix-UPS

489156 30641 476142

Matrix-UPS provides advanced, modular power management for datacenters and mission-critical servers. With an innovative, high-availability design and included software, Matrix means high reliability and manageability to defend your datacenter. Features include:

- User-replaceable, hot-swappable electronics module and SmartCell battery pack
- PowerChute Plus software for Windows 95, Windows NT, Windows for Workgroups, Novell Netware, and SCO Unix
- Line interactive design
- Sine wave output
- Network-grade line conditioning
- Automatic self-test
- Interface serial port
- Automatic Voltage Regulation technology
- Intelligent battery management system
- Audible alarms

Category 5E Twisted Pair Cable

Category 5E cable, unlike Category 5 cable, will support applications that require bandwidth in excess of 100 MHz. For applications such as Gigabit ethernet or analog video over data cable, CAT5E should be used. All aspects of performance are enhanced with CAT5 cable: capacitance, frequency, resistance, attenuation, impedance and NEXT.

CPI – world-class DC, tone, local extensions, multichannel remotes and termination panels for a broad range of mobile and base station radio applications.

T1 and DS-1 Cables

T1/DS-1 cables are suitable for use inside central office buildings or in controlled environment vaults where temperature and humidity are maintained. T1/DS-1 lines are capable of handling up to 1.536 Megabits/second of data. Belden's T1/DS-1 cables feature foil shields to provide superior shield effectivness, greater flexibility and light weight. Bellcore GR-137-CORE Compliant.

Sound, Broadcast & Audio Cable

Tinned copper polypropylene insulated, twisted pair. Beldfoil aluminum-polyester shield, 24 AWG stranded tinned copper drain wire. Gray PVC jacket The jacket & shield are bonded so both can be removed on automatic stripping equipment. Drain wire is on the inside of foil shield. This type cable occupy 1/2 to 2/3 less space than standard cables. Sugg working voltage 300V RMS.

Plenum Breakout Cables

Optical Cable Corporation's tight buffer fiber optic cable. UL Listed type OFNP in accordance with NEC sections 51 (a) and 770-53 (a) for use in ducts, plenums, and air handling spaces. Meets or exceeds requirements for intra-building cables.

- Meets: ANSI X3T9.5 PMD
- ATM 155 Mb/s
- FDDI 100 Mb/s
- Fiber Channel FC-PH
- GR-409-CORE
- ICEA-83-596
- TIA-568, TIA-598-A, TIA-758
- For short and moderate distance links between buildings or within buildings where multiple termination points are needed
- Core-Locked outer jacket
- Helically stranded cable core for flexibility
- Suitable for Indoor and Outdoor use
- Flame Retardant, Fungus Resistant, Water Resistant and UV Resistant
- Bend Radius 15X outside dia.

ndoor/Outdoor Stranded Loose Tube

CommScope indoor/outdoor tight-buffer cables are designed to meet the rigors of outside plant while allowing for direct connectorization of the individual fibers, yet meet the NEC/CEC requirement of "OFNR" riser cable. The OFNR standard eliminates the need for a splice point at the building entrance.

Duplex 106 Wallplate Inserts

411077 470085

The QuickPort Duplex 106 is ideal for applications where two individual modular ports are desired, within the standard '106/NEMA-style' outline that prevails among electrical outlets. It accepts all QuickPort snap-in modules and fits standard NEMA wallboxes and most floor boxes and monuments. It also uses standard duplex wallplates, making installation easier and more cost-effective, particularly in retrofits of existing spaces.

Decora Wallplate Inserts

Combine voice, data, audio and video in one compact, attractive Decora Wallplate. QuickPort Decora Wallplate Inserts offer designer style to match Leviton Decora electrical switches and outlets, with the capacity and flexibility to support high-tech communications for boardrooms or workstations. QuickPort snap-in modules fit neatly into a single gang Decora wallplate and can be combined with Decora electrical devices (with a barrier box) in a multi-gang wallplate.

Combo Front/Rear Manager

420018

Manages both front and rear cables/cords in a 3.5" high standard rack space. Oversized front rings meet larger-capacity requirments for patch cords. Rear management reduces tension stress and maintains bend in radius of cables routed from inside or outside of vertical channels. Provides retention rings and fixed anchor points for 'loose fit' bundle or tie-wrapped installation techniques using plastic or Hook and Loop tie wraps.

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Dimensions, Description, Color	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)

Patch Cords [454-30]

If you are buying these, you may need:

LAN/Cable Qualification Testers . . . . . page 1448

igaMax Patch Cords

Leviton's GigaMax patch cords meet or exceed industry standard or proposed specifications, and use compliant stranded wire as specified by the latest published TIA guidelines to ensure adequate 'flex life.' All have quality construction to maintain the integrity of signal transmission at the cross-connect, which is critical to the performance of the entire cabling system.

esi-Cam Observation System

PRO-VIDEO's Resi-Cam is a affordable video security system that enables home-owners or businesses to keep an eye on their surroundings through a conventional TV set. By combining a CCTV camera system and a PIR motion sensor, PRO-VIDEO has designed an innovative observation system. When the camera/ PIR detects motion (100 deg. with a 20' range) a bell chimes and a video image is sent to a TV. Camera features a wide angle lens with automatic iris. Control unit easily connects to any TV system. Optional cameras, switchers and VCR triggers are also available.

Cisco 800 Series Routers

The Cisco 800 series router provides enhanced network security and proven reliability via Cisco IOS software. Tailored for small offices and telecommuters, recommended for offices of up to 20 users, connecting every user to the internet or LAN via one connection.

- Supports Cisco IOS software
- Standard security with ACL, PAT/NAT, PAP/CHAP, MS-CHAP, Lock and Key, and GRE tunneling
- 33 MHz processor

Cisco 1600 Series Routers

The Cisco 1600 is the proven choice for flexible internet/intranet access for small offices. In addition to the fixed WAN port and one ethernet port, the Cisco 1600 models support one WAN interface card, which allows customers to add or change WAN ports as needed. WAN options include ISDN, T1/E1, Frame Relay, Switched 56, Switched Multimegabit Data Service (SMDS) and X.25

- Support for Cisco IOS software
- Modular WAN card slot
- Flash memory and primary memory upgrade capability
- Modular Desktop Router
- 1 or 2 port 10BaseT ethernet
- 1 port BRI or 1 port sync or async serial
- 33 Mhz processor

Cisco 2600 Series Routers

The Cisco 2600 series routers have modular architecture to provide adaptibility as network technology changes. Driven by a RISC processor. The Cisco 2600 shares modular interfaces with the 1600, 1700, and 3600 series.

- LAN to LAN routing
- Remote Access services
- VPN/Extranet access
- Serial Device Concentration
- WAN Access including ATM services
- Multiservice voice/data networks
- 40 MHz RISC processor
- 1 Network module Slot
- 2 WAN interface card slots

Cisco 3600 Series Routers

The Cisco 3600 series is a family of modular, multifunction access platforms for medium and large offices and internet service providers. Provides solutions for voice/data integration, VPN's, dial access, and multi-protocol data routing.

- Combines dial access, LAN to LAN routing, ATM in a single platform.
- Modular and scalable
- High Density ISDN PRI capabilities
- Support for modem-over-BRI functionality
- Integrated Cisco IOS software
- Full VPN support

Cco 1538 Series Hubs

CISCO Eight port 10/100 Mbps fast Ethernet autosensing microhub. Featuers up to 100 Mbps peak aggregate throughput for bandwidth intensive applicaitons. Flexibility to stack up to four 1538 hubs for up to 32 ports using the integrated stacking ports. Option to manage the Cisco 1538 with the M model. Includes internal bridge function for connecting both 10 Mbps and 100 Mbps ces and extensive LEDs for visual management.

Rate and Interface Converters [459-30]

V.24/RS-232 To V.36/RS-422 Converters

The MIC-24/36 Interface Converter enables connection between the DTE and DCE with V.24/RS-232 and V.36/RS-422 interfaces. MIC-24/36 operates in synchronous applications at data rates up to 200 kbps. MIC-24/36 is used either for connecting a V.24/RS-232 DTE to a V.36/RS-422 DCE, or for connecting a V.24 DCE to a V.36 DTE. These options are switch-selectable. MIC-24/36 performs both the physical and the electrical conversion between the two interfaces and operates without AC power, deriving ultra-low power from the DTE and DCE data and control signals. The circuitry is designed to provide short range interface conversion, i.e., for connection of co-located devices.

- Transparent to protocol
- No AC power required
- Complete with 2 m cable and connectors
- Immediate installation
- Miniature, lightweight

The Ins And Outs Of High Speed Wireless Networking

in —  — out

Whether you need a high-speed wireless LAN or WAN, Proxim has you covered—indoors and outdoors—with the most comprehensive product line in the business. Our line of Lynx® microwave radios and Tsunami™ Ethernet bridges let you securely transmit voice, data and video up to 40 miles, and with up to 860 Mbps capacity. Our ORiNOCO® line of LAN products provides you with the world's leading enterprise-class 802.11a and 802.11b solutions, with .1X encryption and speeds up to 108 Mbps. To learn all about the ins and outs of high-performance wireless from Proxim, go to **www.TESSCO.com** or call **800-472-7373**.

Access Control Devices [601-10]

Access Controller

The Nokia P022 Access Controller is a gateway between the Wireless LAN network and the Internet. The Nokia P022 Access Controller authenticates the user, monitors network usage in real-time, collects charging information and acts as a router. The Nokia P022 Access Controller can be connected to the Nokia Authentication Server for integration into a mobile operators network or to a RADIUS server for integration into other customer, care and billing systems. The P022 is available in versions for SOHO/Cafe environments and for enterprise deployments.

- Optional Interfaces: T1 CSU/DSU, X.21, V.35, ISDN BRI, Dual-Port Ethernet
- Enterprise Chassis is 19" 1U Rack-Mount
- SOHO/Cafe Chassis is 9.5"Wx8.5"Lx2.1"H Desk/Wall mount
- Three integrated 10/100 Ethernet Ports

smartBridges Smart Access Router

This is a wireless router for public access Wireless Internet Hotspot. airRoute is a stand-alone device providing the Visitor Based Networking, security, packet filtering, DHCP server, NAT and personal firewall.

- Three 10/100Base-T Ethernet ports
- One Port Each for Wireless LAN, Wired LAN, and WAN
- Built-in NAT, DHCP, and Firewall
- Zero Configuration Network for Client PC's
- Built-in RADIUS Server
- RADIUS Client for Remote Authentication
- Billing Usage Data: Session Time, Traffic Volume
- Remote Monitoring and Management
- Built-in PPoE for Cable and DSL Modems
- Internal PoE Injector for airPoint AP.

okia RoofTop Wireless Router AirHead

The AirHead is the network access point. Each AirHead supports up to 40 subscriber units, and up to 4 Airheads can be co-located at a single site. Simple installation and a 10/100Base-TX connection for easy network connection. Each AirHead includes 8 dBi omnidirectional antenna, wall and pole mounting hardware, network/power unit, 120 VAC power supply. Purchase interconnecting cable separately.

Nokia RoofTop Router Management System

421130

The Nokia RoofTop router Management System (RMS) helps you configure, monitor, and maintain your Nokia RoofTop network. RMS allows you to configure network routers locally or remotely, making setup and maintenance of your network quick and easy. You can control all aspects of any router including IP, bandwidth controls, DHCP, etc. You can even overlay a map for visually representing the topology of your network. One RMS station can monitor multiple networks. Includes a Quick Start Guide to simplify inititial setup of your Nokia RoofTop system.

- Alarm Monitoring
- Remote Configuration Management
- Performance Monitoring

ironet 1200 Series WLAN

498375

Cisco Aironet 1200 Series access points deliver the security, manageability, upgradability and reliability to create high-performance, enterprise-class wireless LANs. With simultaneous support for both 2.4 GHz and 5 GHz radios, the Cisco Aironet 1200 Series preserves existing IEEE 802.11b investments and provides a migration path to future IEEE 802.11a and IEEE 802.11g technologies. Its modular design supports single- and dual-band configuration, plus the field upgradability to change these configurations as requirements change and technologies evolve.

- ngle or dual radio operation (2.4 & 5.8 GHz)
- ual power source (PoE or Power Module)
- ast aluminum enclosure complies with UL 2043 or installation in environmental air spaces
- dustrial temperature rating
- ual antennas connectors for single or diversity ntenna operation
- 0/100 BASE-T Ethernet backbone port
- Access point control via console port or web browser
- Three integrated LED status indicators
- Standard security cable keyhole
- Security hasp on mounting bracket for padlock
- Expansion slot for 5.8 GHz 802.11a radio (when available)

ORiNOCO PC Card Client Devices

477141

The ORiNOCO PC card provides high-speed wireless networking at 11 Mbit/s, and secure Internet access for laptop and desktop computers, as well as a wide range of mobile client computing devices. The ORiNOCO PC Card is designed with a choice of security levels to protect your data. The Silver PC Card has a 64-bit wired equivalent privacy (WEP) key. The Gold version provides enhanced security with a 128-bit key, using RC4 encryption. The ORiNOCO PC Cards are interoperable with other manufacturers high-speed IEEE 802.11b compliant systems and are fully compliant with the WECA (Wireless Ethernet Compatibility Alliance) Wi-Fi 'wireless fidelity' standard. The ORiNOCO PC card is compatible with WindowsÆ 95/98/2000/CE/NT/XP, AppleÆ Mac OS 7.5.2, 8.6, 9.0, and 9.4, Novell Client 3.x & 4.x, and Linux for Intel processors.

- Type-II PCMCIA Cards
- Intuitive ORiNOCO Installation Wizard
- IEEE 802.11b (Wi-Fi) Certified
- Low Power Consumption (1.4W max)
- 15 dBm (32 mW) Output
- 11 Mbps max
- Available with 64-bit WEP or 128-bit RC4 Encryption

Proxim Corporation is a leading provider of high-performance wireless LAN and wireless WAN products. The company holds leading shares in the fast-growing 802.11b, 802.11a, and license-exempt fixed wireless networking markets.

ORiNOCO Enterprise Access Point

The ORiNOCO AP-2000 Access Point is a full featured wireless bridge that extends the range of wired Ethernet networks and enables easy migratioin to 5 GHz. Dual slot architecture provides configuration flexibilityand increased network capacity through the use of two Network Interface Cards. The AP-2000 provides high level security including IEEE 802.1x. Wireless Distribution System (WDS) support enables wireless conneciton of multiple PC's, providing for complete wireless infrastructure configurations. Web enabled and SNMP network management make configuration and remote management very easy. Wi-Fi compliant with high performance 11 Mbps data rate and a coverage range of 1750 ft / 550 m.

- 5 GHz Migration
- User based authentication and automatic WEP key distribution
- Web-based, full SNMP management, with Embedded Telnet/CLI support
- Power over Ethernet support
- RADIUS-Based Access Control
- WEP and 128 RC4 encryption and MAC Address Control Table
- Enhanced roaming across disparate locations and infrastructures
- Ultra High Density, allows users to create smaller cell sizes to increase capacity
- Auto Channel Selection
- Virtual Local Area Network (VLAN) support

ORiNOCO Public Access Wireless LAN

The AP-2500 is an all-in-one WLAN access point and access gateway that enables a wireless LAN infrastructure for public hot spots. The AP-2500 is a true Hot-spot-in-a-box solution enabling service differentiation and operating cost savings for hot spot operators.

- Supports Wi-Fi 802.11b and 802.11a simultaneously.
- Provides up to 250 concurrent 2.4 GHz sessions per cell
- Provides up to 500 concurrent 5 GHz sessions per cell
- Includes bandwidth management
- Dual slot architecture accommodates two Network Interface Cards
- Wireless Distribution System (WDS) support enables wireless connection between Access Points
- Web enabled and SNMP network management

Colubris Wireless Access Systems

440344 486356

Colubris Networks designs, develops and manufa tures highly secure and reliable wireless network products for applications in Enterprises, Governm Agencies and public area "Hot Spots".

- IEEE 802.11b
- Frequency Band: 2.4-2.4835 GHz
- 11Mbps with fallback rates of 5.5, 2 and 1Mbps
- Range of 100 meters (300 feet)
- Communicates with all Wi-Fi wireless adapters
- Supports all operating systems
- DHCP Server, DHCP Relay, DHCP Client
- PPPoE
- IP Routing: Static and RIP v1, RIP v2
- IPX Routing
- SNMP v1, v2 MIB-II with traps and Colubris MI
- 40/128 bit WEP
- Seamless Roaming (CN1050, CN1054)
- Integrated VPN Client for secure remote conne tion
- Customizable firewall with packet filtering base protocol port and IP address
- NAT with port forwarding
- Web-based management tool
- Web-based firmware upgrades
- Secure (SSL) Management Tools

okia Wireless Lan

445088

447091

Increased mobility is a general trend within the business community. People are spending more and more time away from their office desks, yet they want to have reliable access to corporate database and the Internet. Nokia's Wireless LAN solution provides an excellent way to extend the reach of local area networks. Instead of plugging into a wired LAN wall outlet, you can connect to the corporate network through your PC and personal wireless LAN card fast and easily and have broadband-speed data rate available - without wires.

- l Roaming Capabilities Between Access Points
- grated Smart Card Reader For Secure Authentication, Authorization, and Accounting
- To 11 Mbit/s Data Rate
- Complies with IEEE 802.11b Standard
- License-Free 2.4 GHz Band

Raylink Access Points

The Raylink Access Point is a wireless LAN-to-Ethernet bridge which provides direct, transparent access to an existing wired Ethernet LAN. With overlapping Access Points, mobile computer users can roam seamlessly from one Raylink Access Point to another while maintaining a live network connection. Designed for use with the Raylink PC Card.

- 2 Mbps Optimized Data Throughput
- Built-in 10BaseT Ethernet support
- Diversity antennas to reduce fading and multi-path
- Network Operating System independent
- 802.11 Compliant (FHSS)
- Includes Raylink PC Card with integrated radio/antenna
- Supports 61 Concurrent Users
- RS-232 Diagnostics port
- 100 mW Output Power
- User Authenticaion and Password Protection
- Upgradeable FLASH Firmware
- SNMP/MIB II Compliant
- Windows 9x/ME/2000/NT Support

smart **Bridges**

to the future...

Build carrier-class, cost-effective wireless infrastructure with smartBridges' easy-to-deploy and maintain indoor/outdoor radios, access points and accessories for all your Internet and WLAN needs.

smartBridges Enterprise Access Point

This is an advanced long-range wireless access point catering to the high performance needs of enterprises. airPoint supports Power over Ethernet (PoE) and with its great features is positioned to the heart of complex and diverse wireless LAN networks.

478303

- IEEE 802.11b
- 2.4-2.4835 GHz
- 100 mW Radio Output
- Excellent -95 dBm Receiver Sensitivity
- 128-Bit WEP Encryption
- simpleManager Remote Management Software Included
- Wall, Ceiling, or Desktop Mounting
- PoE Remote Powered, Injector and Power Supply Included

ORiNOCO Ethernet/Serial Converters

412123

With the ORiNOCO Ethernet & Serial Converter products your organization can now build a complete wireless LAN solution for in-building connectivity. Now you can wirelessly connect all systems that are equipped with Ethernet ports and/or Serial ports to the Wireless Infrastructure. Customizing the unit parameters can be achieved via the WaveMANAGER/EC tool that is shipped with every unit. In case of an RS-232 client the unit requires simple configuration via the WaveMANAGER/EC or via the RS-232 port.

- 10Base-T (RJ-45) Ethernet Port
- RS-232 (DB-9) Serial Port (EC-S only)
- Serial Speeds 112.5 to 230,400 baud
- WaveMANAGER/EC Configuration Software
- 5 VDC power (120VAC Adapter Included)

ORiNOCO Small/Medium Enterprise AP

453193

Attractively priced full-featured wireless bridge for 10-50 users. ORiNOCO AP-500 extends the range of a wired Ethernet network, creating a wireless LAN. If youre an enterprise and you want to provide mobility, AP-500 offers an ideal cost-effective infrastructure solution. This high performance wireless bridge supports all wireless LAN features in exactly the same way as the AP-1000, except it's single radio slot is already filled with a Gold PC Card radio.

ORiNOCO USB Clients

439112

The Agere ORiNOCO USB Client provides high-speed (11 Mbit/s) wireless Internet Access and networking for USB enabled desktops anywhere, anytime. No need to open the desktop to install a wireless network, no worries about device conflicts, no searching for a power supply or vacant ISA or PCI slot. The USB Silver Client supports wired equivalent privacy (WEP), using a 64-bit key. The Gold version provides enhanced security with a 128-bit key, using RC4 encryption. IEEE 802.11b compliant, Wi-Fi certified.

- Includes 36" USB Cable
- For Windows 95/98/SE/ME/2000

ORiNOCO Active Ethernet (PoE)

436128

Active Ethernet is a feature of the ORiNOCO product line that provides power-over-Ethernet (PoE) capabilities for the entire ORiNOCO family of enterprise, outdoor, and public area wireless networking equipment, including Access Points, Access Servers, and Outdoor Routers. Active Ethernet eliminates the need for power blisters (ac-to-dc converters) and 110/220V AC cabling installation. With Active Ethernet, system installers need to run only a single Ethernet cable instead of separate power and data cables to each Access Point base station, saving up to $1,000 per installation. The Active Ethernet solution consists of a power injector that injects the DC power onto the Ethernet cable. The Active Ethernet unit constantly checks the Ethernet cable for a device that can handle PoE. If it does not detect such a device, Active Ethernet switches off power for that port. This power-monitoring capability protects other devices connected to the Ethernet cable with power as well as the input port of the switch in case of an installation error.

ORiNOCO High-Security Access Server

The ORiNOCO AS-2000 Access Server is a highly secure, high speed wireless networking system that allows roamin throughout a facility and wireless connectivity for service providers, educational institutions and enterprises. The AS-2000 can be used in security sensitive areas such as office facilities, auditoriums, classrooms, airports, hotels, convention centers, and multi-dwelling and multi-tenant housing units. The AS-2000 delivers significantly enhanced levels of wireless networking security.

- 128-bit RC4 encryption keys.
- 10/100 Ethernet support
- Standard SNMP v2
- Uses one or two ORiNOCO 802.11b (Wi-Fi) compliant radios (not included)
- Unprecedented security with industry-standard RADIUS AAA protocol
- Optional Active Ethernet
- Automatic Key Exchange

ORiNOCO Outdoor Routers

High speed data networking system for point-to-multipoint and point-to-point links operating in the 2.4 GHz band. The system includes the ORiNOCO COR-1100 Central Outdoor Router, the ROR-1000 Remote Outdoor Router, and the Outdoor Router Client (ORC). Connect remote LAN's with the ROR, and remote clients with ORC's.

441155

- Autoselect data rate: 1 to 11 Mb/s
- Up to 16 Remote Outdoor Routers or 32 ORC per channel
- Up to 3 co-located channels.
- Adaptive Dynamic Polling: No Hidden Nodes
- Data Compression
- Authentication-based MD-5 CHAP
- MAC Address Table Access Control
- Bandwidth Control per ORC
- Protocol Filtering for Bridged Protocol
- Encryption (via PC card): 64-bit WEP, 128-bit RC4
- Transparent to VLAN tags
- Access Point Roaming: ROR's become Access Points for local clients when 2nd PC card radio is installed
- IP Routing (RIP 1 compliant)

Raylink Integrated Antenna WISP Clients

464377

Raylink's all-in-one CPE units are easy to install. With a built-in 12 or 18 dBi Flat panel antenna, there is only 1 piece to mount. Simple installation with an included universal mounting bracket allows a broad range of vertical and horizontal adjustment. Connect to client computers through an Ethernet cable, with no need to open up the computer to install cards. These units include everything you need for an install, including mounting bracket, POE injector/network port, AC adapter, and 50 feet of twisted-pair interconnect cable with custom connectors. Choose the antenna gain that best matches your needs.

- Remotely Managed
- Locally or Remotely Configured
- 2.4 GHz operation
- Ethernet data connection
- Status indicators on back of unit
- Flexible mount included.
- Bridged network handles 2048 learned nodes
- ∑ Authentication and Access when used with Raylink AP Controller

eezeNET 5.8 GHz Outdoor Bridges

The BreezeNET DS.5800 series of products - designed specifically for challenging environments and adverse weather conditions - provides efficien, cost-effective point-to-point and point-to-multipoint wireless bridging and backhauling. Operating in the 5.8 GHz band, the DS.5800 can bridge distances of up to 50 km (30 miles) at 11 Mbps, making it an ideal solution for Internet backhauls, campus interconnectivity, and community-wide networking.

- 25 - 5.85 GHz
- Channels, 4 non-overlapping
- to 11 Mbps Data Rate
- nge Up to 30 Miles (PtP) or 11 Mile (PtMP)
- se Unit supports up to 128 Remotes
- motes support up to 1024 Ethernet devices
- l LED diagnostics and RSSI display
- mote Diagnostics
- SNMP remote management
- Smart DHCP client
- Standard 10Base-T Ethernet Connections
- Indoor/Outdoor Architecture for easy installation
- Uses Low-Cost Twisted-Pair Between Indoor and Outdoor Units (Included!)
- Integral Lightning Protection
- Demonstration Kit Available

eezeACCESS Indoor DSU

11413

The Access Units provide all the functionality necessary to allow remote Subscriber units to communicate over the wireless infrastructure with the base station at data rates up to 3Mbps. The AU-I series comprises stand-alone integrated units for indoor use (antenna can be installed outdoors) that can operate independant of each other or synchronized with each other.

- ta Rate: 3 Mbps
- tput Power 1 w max at antenna port
- dulation:Multilevel GSFK
- RF Connectors:2 x SMA female
- Ethernet: 10BaseT RJ-45

BreezeACCESS II CX Cell Extender

484308

The BreezeACCESS CX Cell Extender, designed to re-distribute broadband coverage from a primary wireless base station while also serving as a local subscriber, can connect users who were previously unreachable due to obstructions such as foliage or hills. This eliminates the need to deploy costly new backhauls and base stations to connect lucrative pockets of subscribers, significanly improving the economics for wireless broadband deployments. The BreezeACCESS CX Cell Extender incorporates the features of a mini-base station, backhaul, and subscriber into an integrated, easy to deploy package.

- Three-piece, 100% outdoor mount for installation flexibility
- Integrated Ethernet for local subscriber
- full LED Diagnostics for quick alignment and association count
- Remote telnet or SNMP, or local serial for easy management
- Integrated 21 dBi antenna on SU for faster deployment
- Choose your antenna for the AU for custom coverage
- 2.4 GHz
- 3 Mbps
- For BreezeACCESS II systems
- 110-240 VAC, 50-60 Hz, 1.4A max

BreezeNET PRO-11 Outdoor

45601

The BreezeNET PRO.11 Outdoor product line is an IEEE 802.11-compliant wireless networking product designed to provide high performance wireless point-to-point and point-to-multipoint links. Bridging office buildings, campuses, or any remote site. Plug and play at its best, robust, withstanding the most adverse of conditions.

- Data rates of up to 3 Mbps, at distances of up to 50Km (30mi)
- Roaming speeds up to 100km/h (60mph).
- Frequency Hopping Spread Spectrum (FHSS)
- IEEE 802.11 and IEEE 802.3-compatible
- WEP-Wired Equivalent Privacy (RC4 encryption & authentication)
- Form factor sized PCMCIA card with retractable diversity antennas
- Load balancing among collocated access points
- Connects to any standard Ethernet port
- Excellent Multi-Path Rejection
- Simple Deployment - No Frequency Planning Required

Raylink WISP AP Controller

WISP AP Controller is an IEEE 802.11-compliant wireless networking product with the built-in bridging functions. F tures include Infrastructure Access Point mode, Quality o Service (QoS) bandwidth shaping, firewall, and MAC addr filtering. This unit is the perfect solution for wireless poin to-point and point-to-multipoint connectivity.

- Weatherproof Outdoor Enclosure
- Powered by CAT5 cable with provided DC injector and AC-DC converter
- N-type Jack RF connector
- RJ-45 10Base-T Ethernet connector
- 2.4 GHz FHSS or DSSS
- 20 dBm RF Power Output
- Bridging mode supports 2048 MAC addresses and 7 VLAN's
- Quality of Service (QoS) control
- Packet Filtering
- Bandwidth Management by port, IP, or MAC
- Operating Temperature Range: 0 - 55 Celcius
- Remote or local management via included Windows-based utility
- Field upgradeable firmware
- Security features include RC4 Authentication, IP Access List, Protocol Filtering, and VLAN's.

Raylink WISP-Out-of-Box Packages

WISP-Out-of-Box Professional package is the easiest, lowest-cost way to build a wireless ISP. It includes everything you need to build a 5-mile point-to-point wireless link with features such as Infrastructure Access Point mode, Quality of Service (QoS) bandwidth shaping, firewall, and MAC address filtering. Store up to 2,048 MAC addresses in the bridge table and allow to connect up to 128 users. Coverage range depends upon the height and radio line of sight.

- WISP Access Point (AP)
- WISP USB Client
- Two 18 dB Flat Panel Antennas
- Coaxial Lightning Protector
- 50' LMR-400 With Connectors
- Two 3' LMR-400 Jumpers
- 100' CAT5e Cable with Connectors
- Setup Diagram
- User's Manual
- Installation CD
- 100 mW output power
- FHSS
- 2 Mbps data rate

smart Bridges
to the future...

Build carrier-class, cost-effective wireless infrastructure with smartBridges' easy-to-deploy and maintain indoor/outdoor radios, access points and accessories for all your Internet and WLAN needs.

smartBridges Access Point

490327

This wireless Access Point is especially designed for outdoor installation and long range operation. It supports Client-Bridge, Point to Point and Point to Multipoint modes, making it a versatile wireless device. It uses automatic radio tuning technology to ensure that the airPointPro Outdoor can inter-operate with any standards compliant device. airPointPro Outdoor features LongRange wireless radio that provides enhanced power to deliver high data throughput and long operating range.

- NEMA 4X enclosure
- -40 to 55 C Temperature Range
- Pole or Wall Mount with Supplied Hardware
- SNMP Managed
- Includes Power Supply and Injector
- 50' CAT5 cable, extendable to 300'
- -92 dBm at 1 Mbps, -83 dBm at 11 Mbps
- Range up to 21 Miles at 11 Mbps
- Requires External Antenna, Not Included
- N-type Jack Antenna Connector

smartBridges Ethernet Client

482394

This wireless Ethernet client device is especially designed for outdoor installation and long range operation. It features enhanced sensitivity, rugged weather-proof design, "dial-a-power" capability and flexible antenna options. With easy installation, plug-and-play and a PoE injector, this is a breakthrough solution for WISPs and for a variety of other outdoor settings.

Proxim — The Capacity to Do Great Things.

ORiNOCO AP-2500 is an all-in-one wireless LAN access point/subscriber gateway providing Internet access for enterprise visitors and public access hot-spot-in-a-box capabilities.

Tsunami Multipoint

The Tsunami Multipoint Wireless Ethernet System is a point-to-multipoint outdoor wireless system offering a high speed, high-capacity alternative to wired data networks.

- Speeds from 20 Mbps to 60 Mbps using Time Division Duplexing (TDD) per Base Station
- Six Base Stations provide 360 degree coverage delivering up 360 Mbps
- Network management through SNMP & Java-based software
- Point-to-Multipoint communications from less than 1 mile(kilometer) to more than 8 miles(13kilometers)
- Operates in the 5.8 GHz frequency band
- 1024 Max Subcriber Units/Base Station

Proxim Stratum MP

440069

Stratum MP is a high performance multipoint wireless bridge for last m broadband access and enterprise bridging applications. Typically delivers up to 50% more throughput and up to 100% less latency than wireless bridges on the 802.11b standard, so it supports more users and provid more bulk capacity.

- 10 Mbps, half duplex
- Point-to-Point fo linear topologies
- Point-to-Multipoint for celluar topologies
- 32 nodes per cell
- Configure MAX packets to sendfrom each node pe polling cycle
- Up to 2,000 MAC addresses supported per network segment
- Flash downloadable upgrades in field
- Direct Sequnece Spread Spectrum (DSSS)

SPEEDLAN 8000 Wireless Ethernet Bridges

461197 460102

SPEEDLAN 8000 series products are high-pe formance 11 Mb wireless solutions designed robust building-to-building communications. Enterprise users and service providers choo these products due to its many high quality f tures. SPEEDLAN 8000 series products fea- ture Network Address Translation (NAT), Dynamic Host Control Protocol (DHCP) Server, and fully configurable bandwidth. The 8300 acts as a central base station and the 84 acts as Customer Premise Equipment (CPE).

- Protocol independent
- 8100/8200 are Outdoor Mount using CAT5 cable
- 8300/8400 are Indoor Shelf Mount using RF cable
- Configurable bandwidth from 1Kb to 11Mb
- 2.4 GHz (2400MHz - 2483.5MHz, ISM band)
- Distances to 25 miles
- Polling base station supports up to 48 CPE units
- Supports DHCP, NAT
- Wireless data encryption (128 bit)
- Direct Sequence Spread Sprectrum (DSSS)
- No software to install on network or workstations
- Includes IP routing

Wave Wireless SPEEDLAN 9000 Routers

460325

For applications that require connecting multiple buildings, a star topology may be the best choice. One SPEEDLAN 9000 unit acts as a "polling" central base statio while the other units are configured as CPE's. System consist of a 11 Mb star top ogy base station (9103) and CPE Flexnode routers (9102) . Features DHCP serv and client, NAT and IP routing. Antennas and Installation kits/cables should be pu chased separately.

EEDLAN Single Device Adapters/PCMCIA

419152

SPEEDLAN Single Device Adapters (SDAs) allow Small-Office / Home-Office (SOHO) and residential users to receive broadband wireless Internet access from a SPEEDLAN enabled Internet Service Provider. Featuring fully configurable bandwidth for each remote user, ISP's can now offer broadband services to entire cities without any dependency on the local telephone network. SDA's are used to connect with a SPEEDLAN 8000 series base station at speeds up to 11Mb. The SPEEDLAN 8000 series SDAs are offered as PCMCIA radio cards. ISA or PCI adapters are available for the cards as well.

ORiNOCO Outdoor Router Licenses

450121

Outdoor Router Licenses convert Access Points into central or remote outdoor routers. PC Card clients are converted into Outdoor Router Clients. If you already own the hardware, use this software package to convert it into outdoor gear. Packages consist of software, manual, and instructions for obtaining activation keys from Agere.

- Convert AP-1000 into COR-1100
- Convert AP-1000 into ROR-1000
- Convert PC Card into ORC

Free Space Optics [596-60]

PAV

PAV Free Space Optics provides license-free, secure, line-of-site data and voice communications with bandwidths from 1.54 Mbps to 1 Gbps.

AVLight Outdoor Units - Up to 155 Mbps

PAVLight Linkhead outdoor units provide the optical components for a free-space optical data link. The ODU contains one or three optical transmitters, a receiver, and a fiber interface board. The connection between the linkhead and indoor unit is fiber optic for the data and shielded twisted pair for power.

0 to 65 C Operating Temperature
0 x 180 x 550 mm size for single transmitter
0 x 360 x 550 mm size for triple transmitter
eavy duty steel cabinet, powder-coated white
Veatherproof

- One or three transmitters
- PIN diode receiver
- 15 degree field-of-view
- Powered by indoor unit

Phone Line Extender

The Trailblazer Phone Line Extender delivers two full-service phone lines with true networ dialtone, including crystal clear voice and wire-equivalent V.90 dial-up modem speeds. Both lines can be used for either voice or data. Each kits includes two units, one FXO, one FXS, with integral 14 dBi antennas.

- Unlicensed 2.4 GHz Operation
- Simple Pole Mount Installation
- 14 dBi Antenna Built-In
- 30 dBm ERP Using Internal Antenna
- 14 Mile Range With Internal Antenna
- 40 Mile Range With Optional Antenna
- 5 ms Latency End-to-End
- Housed in a NEMA 4X Enclosure.
- Works with FAX and V.90 modems.
- Co-locate 4 to 6 Trailblazers for Multiple Custom ers
- All-Digital Repeater Available Separately.
- N/Female Connection for Optional External Antenna

Lynx T1 Radio

Proxim Lynx 2.4GHz T1 unlicensed direct sequence spread spectrum radio. The one piece indoor design, loop back functions, flexible power connections and external adjustments result in a system that is easy to install and maintain. Easily connected to voice, data or video sources. Typical applications include Cellular/PCS base station interconnect, rural telephone and remote data applications.

- One to eight independent DS1 (1.544 Mbps) channels
- Point to Point from 1 to 50 miles
- Built in Loop-Back and Far-End monitoring and orderwire
- High system gain and Forward Error Correction
- Spread Spectrum Technology
- Power: +24 or -48 VDC
- Two Service Channels
- Data Rate: 1.544 Mbps
- RF Conn: N Female
- Output Power (2.4 GHz): +27 dBm
- Output Power (5.8 GHz): +20 dBm
- RF Attenuation Range (2.4): 16dB
- RF Attenuation Range (5.8): 20 dB
- Coding: Direct Sequence
- Processing Gain: 10 dB
- Digital Interface: DSX-1 to 4 x DSX-1
- Connectors: DB9, RJ-45

Lynx Fractional T1 Radio

Proxim LYNX Fractional Capacity Radio modems for point to point wireless communications. Fractional capacity models provide full-duplex synchronous communications from 56 kbps to 512 kbps. Easily connected to voice, data or video sources. Typical applications include rural telephone and remote data connections, such as Internet service provision or in-building extensions of LAN or PBX systems.

- Two independent data channels
- V.11 (V.35) interface
- Full duplex, user selectable synchronous data
- Data Rates: 56 kbps to 512 kbps
- Point to Point communication to 80 km
- Far-End monitoring, loopback, orderwire
- Output Power (2.4): +27 dBm
- Output Power (5.8): +20 dBm
- RF Attenuation Range (2.4): 16dB
- RF Attenuation Range (5.8): 20dB
- Modulation: QPSK
- Coding: Direct Sequence
- Processing Gain: 10dB
- Data Capacity: Selectable 56, 64, 128, 256 kbps
- Data Interface: v.35 (34 pin), EIA-350, RS232 DB25F
- Power: +/-20 TO +/- 60 VDC

LYNX DS3 U-NII Radios

The LYNX.sc DS-3 microwave radio provides wireless fu duplex DS-3 connectivity (~45 Mbps) under the U-NII, L LAN license free regulations. The LYNX.sc DS-3 is ideal backbone and spur connections of PCS and Cellular syst In addition, ISPs and CLECs can establish new point of p ence and direct connections to enterprise customers with this solution. Order in pairs, A1 or B1/B2 channels.

- DS-3 (45 Mbps) Interface
- Single channel: 5.725 - 5.825 GHz
- Dual channel: 5.250-5.350 / 5.725-5.825 GHz
- Wayside T1
- Point to Point communications from 1 to 15 miles
- Built in loop back and far-end monitoring and orderwire
- Antenna Conn: N-Female
- DS-3 interface: dsx-3
- Conn: BNC Female, 75 Ohm
- Line code: B3ZS
- Output Power (1 chan): +20 dBm typical
- Output Power (2 chan): +13 dBm typical
- RF Attenuation range: 20 dBm min.
- Receiver threshold: -79 dBm, BER: 10^-6
- System gain: (1 chan) 97 dB, (2 chan) 90 dB
- Power: +/- 20 to +/- 63 VDC

nx OC-3 Digital Microwave Radio

Lynx OC-3 is a License-Exempt digital microwave radio that provides wireless full-duplex OC-3 connectivity for distances exceeding 7 miles (11 km)eat a significantly lower cost than leasing dedicated OC-3 lines or trenching for fiber. Using high-quality radios and standard SONET interfaces, Lynx OC-3 allows you to quickly connect locations or add redundancy to existing SONET network infrastructure. Lynx OC-3 offers significant cost savings compared to leased-line connections, and provides a time-to-connection advantage where new

s are impossible or too costly.

- C-3 interface and capacity
- dditional T1 lines for voice or data
- /5.8 GHz license-exempt frequency
- mpliant with industry standards
- w power consumption ø 100 W
- Wide operational temperature range
- Built-in loopback, far-end monitoring, and private telephone network orderwire.
- 2-year warranty
- SNMP and HTTP management interfaces

Unlicensed Ethernet [598-30]

)Mbps Wireless Ethernet Bridge Kit

PROXIM STRATUM full duplex building to building data bridge plus two T1's. Supports range up to 4 miles . Includes two indoor units, two outdoor units with integral 18" antennas and two antenna mounting brackets. Kit does not include DC power cable from IDU to ODU or fiber optic cable. Each side of the STRATUM bridge requires one shielded, 2 conductor 18 gauge cable with drain wire for DC power. Maximum cable length is 1000 feet. Each side of the STRATUM bridge also requires a UV-shielded cable containing a mini-

m of two 850 nanometer multi-mode fibers with ST connectors. Fiber sub-cables should have outside diameter of 2.7-3 millimeters. Maximum cable length is 1000 feet.

- 25 to 5.85 GHz
- ata Rate: 20 or 100 Mbps depending on model
- nsitivity: -77 dBm
- odulation: QPSK
- R: 10^-12
- ansmit Power: -1dBm typical
- ower Adj: -27 to -1 dBm
- IF Conn: ST-Fiber
- Data Conn: RJ-45/ 2x DSX-1
- Power Supply: 90-240 VAC
- Power Consumption: 55 Watts
- Mounting: 1.9-3.5" pipe
- Cabinet: 19" Rack Mount

proxim *The Capacity to Do Great Things.*

Tsunami(tm) wireless Ethernet bridges provide cost-effective building-to-building connectivity with 99.999% availability and speeds ranging from 11 to 860 Mbps.

Tsunami 10 BaseT Wireless Bridge

Proxim Tsunami wireless bridges provide full duplex 10 baseT (fast ethernet) connectivity under the ISM license free band. For line of sight distances up to 50 miles. Uses Spread Spectrum technologies.

- Operates in either the 2.4 or 5.8 Ghz ISM band
- Wayside E1 available on some models
- Point to Point for less than 1 mile to 50 miles
- Built in loopback, far-end monitoring and orderwire
- Sensitivity: -5 dBm error free
- Processing Gain: 10 dBm, minimum
- RF Attenuation Range: 20 dB min
- Data Interface: 10 baseTX (cat 5)
- Data Conn: RJ-45
- RF Conn: N-Female
- Test Points: Output power, near and far-end RSL
- Power: +/- 20 to +/- 63 VDC
- Optional AC power adapter (22137)
- Order in Channel pairs. A1/A2, B1/B2 etc.

Tsunami 100 BaseT Wireless Bridges

Proxim Tsunami wireless bridges provide full duplex 100Base-T (fast ethernet) connectivity under the ISM license free band. For line of sight distances up to 15 miles

- Single Channel: 5.725 - 5.825 GHz
- Dual Channel: 5.25-5.35 & 5.725 - 5.825 GHz
- Wayside T1
- 45 Mbps full duplex, 90 Mbps total
- Point to Point for less than 1 mile to 15 miles
- Built in loopback, far-end monitoring and orderwire
- Sensitivity: -79 dBm, BER 10^-6
- System Gain: 97 dB (90 dB dual channel)
- Output Power: +20 dBm typical
- Conn: N-Female
- Power: +/- 20 to +/-63 VDC
- Optional AC Adapter (22491)
- UNII Radio
- Order as a Pair, A1 and A2, or B1 and B2 channel options

ORiNOCO Point-to-Point Backbone Kit

The Point-to-Point Radio Backbone Kit is an easy to install, highly reliable 11 Mbit/s building-to-building Wireless LAN connectivity solution. The kit includes all the necessary hardware, software and management components needed to establish a license-free 2.4 GHz wireless LAN bridge that spans up to 6 miles under clear line-of-sight conditions.

- High Performance 2.4GHz Integrated 11 Mbit/s Radio
- 128-Bit Key Security using RC4 Encryption
- Adaptive Dynamic Polling
- Protocol Filtering for Bridged Protocol
- Transparent VLAN Tagging
- Remote Wireless Link Analysis
- No License Required
- Factory Pre-Configured for Network Bridge Operation
- Up To 6 Miles Range
- IEEE 802.11b Compliant

3Com 11Mbps Wireless Ethernet Bridges

The 3Com Wireless LAN Building-to-Building Bridge delivers three to four times the bandwidth of T1/E1 links and works at distances up to 16.9 km (10 miles).

- 802.11b
- Up to 11 Mbps
- External Antenna connector
- 40- and 128-bit WEP shared key
- Web interface UI
- Unlimited number of users/bridge
- Unlimited number of bridges/LAN
- Includes crossover cable, power supply and mounting kit
- Can also be used for Point-to-Multipoint applications.
- Will interoperate with any Wi-Fi compatible access point

Base Stations, In-Building Phones [228-10]

Link WTS Base Stations

Base stations provide the communication channel between the MCU and the phones. Uses spread-spectrum frequency-hopping. Each base station supports multiple users and can cover a trasmission area in excess of 50,000 square feet. Calls are passed from one base station to another as a user walks through the coverage area. Designed for mounting at or near the ceiling. An outdoor enclosure is available for outdoor use or hostile environments.

- 902-928 MHz
- FCC Certified under part 15.247
- 100mW peak, 50mW average transmit power
- Four Digital TDMA channels
- Frequency-Hopping Spread Spectrum
- Dimensions: 8.8"L x 5.4"W x 1.5"D
- Temp range: 0-40Deg C (standard version)
- -20 to 50 Deg C (outdoor version)
- Coverage up to 50,000 sq feet per unit

Master Control Units (900 Mhz)

The Link 150 master control unit (MCU) is a compact modular unit designed for small installations. Provides interfaces for 16 telephone ports and 4 base stations. Up to 4 Link 150 MCUs can be combined to support a max. of 64 wireless phones and 16 base stations.

- Up to 64 Wireless Telephones
- Up to 16 Base Stations
- Up to 32 simultaneous calls
- Covers up to 1.5 million sq ft.
- Uses RJ-11 mod jacks
- Power: 120VAC
- High Speed digital Base Station interface
- Requires 22/24 ga.two pair cable
- Dimensions: 9"L x 8.4"W x 2.8"D
- Front panel Adminstration
- Note: When expanding, use Model 2 MCUs, (not compatible with the M3)

Link 150 M3 Master Control Units (MCU)

The Link 150 M3 master control unit (MCU) is a compact modular unit designed for small installations. Provides interfaces for 16 telephone ports and 4 base stations. Up to 4 Link 150 M3 MCUs can be combined to support a max. of 64 wireless phones and 16 base stations. Note: The M3 units are not compatible with the Model-2 units when expanding a Model 2.

- Up to 64 Wireless Telephones
- Up to 16 Base Stations
- Up to 32 Simultaneous calls
- Covers up to 1.5 million sq ft
- Uses RJ-11 jacks
- Power: 120VAC
- High Speed digital base station interface
- Requires 22/24ga two pair cable
- Dimensions: 9" x 8.4" x 2.8"
- Front Panel Administration
- More Universal interfaces than the Model 2
- Not compatible to expand existing model 2 installations
- Has ability to select PBX type
- Software can be updated remotely via the MCU's internal modem

Phone Sets and Accessories [228-20]

Link Wireless Telephones

The Link Wireless telephone is a durable phone that operates with all the functionality of a wired desk phone. The alphanumeric display supports messaging from either telephone switching equipment or an external data application. Allows features such as transfer, conference, and hold in analog systems or more advanced features in digital systems. Each phone requires a "line appearance" port from the telephone system.

- Frequency: 902-928 MHz
- FCC Certified under part 15.247
- 100mW peak, 12.5mW avg. transmit power
- Transmits via FHSS frequency hopping spread spectrum technology
- Display: 2 x 16 character alphanumeric
- 2 hrs talk, 40 hrs standby on standard battery
- 4 hrs talk, 80 hrs standby on high capacity battery
- Dims: 5.9"L x 2.0"W x 1.0" D
- Weighs only 6 Oz.

Cellular Specialties 110 Series

23230

The model 110 In-Building Amplifier provides amplification of both u and downlink wireless signals in areas with moderate to strong signa els outside. The 110 amplifier is designed to provide wireless covera smaller facilities with up to 10,000 square feet of required coverage a Typical facilites include: offices, small warehouses, homes, basements, other shielded structures.

- Works with Both Digital and Analog systems
- Includes Power Supply
- External Antenna Port
- Wall Mountable

llular Specialties 510 Series

The Model 510 In-Building Amplifier provodies amplification of both uplink and downlink wireless signals in facilites located within coverage of cell sites.

ical Applications:
king Garages
arehouses
emenents
elded Structures
tal Buildings
fice Complexes

- Campus Environments
- Hospitals
- Convention Centers
- Wall Mountable
- External Antenna Port
- Includes Power Supply
- Optional Monitoring Capabilites

2.4 GHz Outdoor Amplifiers With AGC

Waterproof bi-directional pole-mounted amplifier for use with 2.4 GHz radio modems and Wireless LAN equipment. Automatic Gain Control (AGC) adjusts the Radio Frequency (RF) power output to deliver maximum power at various input levels while minimizing distortion. Remote mounting allows the amplifier to be located right next to the antenna so full transmit power is right where it is most effective. Power is supplied via the coaxial cable using the included DC power injector. The injector is placed in a convenient indoor location. ONLY FOR SALE AND USE WITH SYSTEMS CERTIFIED UNDER FCC PART 15 RULES.

- For DSSS or FHSS Radios
- Bi-Directional TDD Mode
- Power Supply and DC Injector Included
- 120 VAC Power
- Lightning Protected
- N-Type Female connectors
- Operating Temperature: - 40 C to + 70 C
- Mounting Hardware Included

S iNET

The MDS iNET 900 is a long range, high speed, industrial wireless IP/Ethernet solution. It allows customers to bring business information over Ethernet or a serial gateway and onto networks. This includes mission-critical, revenue-generating data from fixed assets such as oil and gas wells, compressor stations, pipelines, fluid storage tanks and utility meters. It also enables portable network access for vehicle based operation.

- trial Grade IP/Ethernet transciever
- 928 MHz ISM band
- rage range up to 30 mi. (40 Km.)
- TNC female antenna connector
- 512/256 Kbps (user configurable)
- 1 Watt TX power

S TransNET

MDS TransNET is a flexible, high speed, compact license-free wireless solution that provides reliable long range data transportation at up to 115 kbps. The TransNET provides transparent data communications for nearly all SCADA/Telemetry protocols. Applications include SCADA, Industrial Automation, Process Control, Gas and Oil Exploration, Production and Transportation.

- kbps throughput
- strial Grade
- 928 ISM Band
- Can be used as remote, master or repeater station
- Adjustable RF power output
- RS-232 / RS485 interface

NOKIA
CONNECTING PEOPLE

Introducing Machine-to-Machine Solutions from Nokia. The Nokia M2M Platform is an open, wireless platform that connects Internet-accessible server applications to wireless remote devices.

Nokia M2M Gateway

The Nokia M2M Gateway is middleware for establishing wireless machine-to-machine applications. The Gateway provides wireless connection establishment and protocol translation between applications located in the company server and in compatible remote devices. Wireless connectivity services can be rented from the network operator, or companies can operate their own modem pool to provide access to the remote applications through a standard fixed network.

- Runs on Windows NT 4.0, Windows 2000, HP UNIX and Sun Solaris v.7
- Optimizes air interface usage for packet switched connections (SMS, USSD, GPRS)
- Central configuration and management performed at host computer with standard web browser
- TCP protocol for Internet connectivity
- Includes RADIUS authentication service for CSD/HSCSD/GPRS authentication
- Stats collection and logging service for events
- Provides Connection Provider API and Interoperable Object Reference API
- Provides an Interface to SMS-C for standard text messaging
- IP address allocation for terminals with GPRS
- Smart messaging for efficient terminal installation
- Supports Nokia, Logica-Aldiscon and Sema SMS Centers
- Bearer support includes SMS, CSD, HSCSD, USSD and GPRS
- Gateway services also available

NOKIA
CONNECTING PEOPLE

Introducing Machine-to-Machine Solutions from Nokia. The Nokia M2M Platform is an open, wireless platform that connects Internet-accessible server applications to wireless remote devices.

Nokia M2M Connectivity Terminals

The Nokia GSM Connectivity Terminal is a M2M (machine-to-machine) communications device with versatile interfaces and advanced functions. Connected to different machines and devices, it provides wireless connectivity and remote management possibilities for remote applications.

- EGSM900/GSM1800 frequencies (Nokia 30)
- GSM 850/1900 frequencies (Nokia 31)
- Data Bearers: GPRS, CSD, SMS, USSD (Nokia 30 and 31). HSCSD (Nokia 30 only)
- Internal antenna with external antenna connector
- Built in SIM card reader
- Supports SMS, USSD (MO, MT) messaging services
- GSM encryption, GSM security codes, AutoPIN, authentication

TESSCO
TECHNOLOGIES®

Financing Solutions Go Way Beyond Open Terms

TESSCO's financing is collaborative, flexible and specific to your unique business needs. We're committed to providing timely and sufficient financing to minimize interruption in flow of products and services to you!

Open Terms

Our credit-granting process is simple and timely!

NEW!
TESSCO Extended Payment Terms

Take advantage of your good credit history to leverage your short-term financing needs.

- Available terms of 3, 6, 9 or 12 months
- Low fixed-interest rates
- Ability to budget fixed monthly payments
- Keeps existing lines of credit free
- Quick turnaround time

Joint Purchase Order Program

Increase your business credit capacity by leveraging your customer's credit-worthiness to secure a higher credit line for bigger purchases. Your customer issues a joint purchase order to both you and TESSCO, using TESSCO's remittance address. Your customer pays TESSCO directly, and you will be reimbursed within 24 hours. Your margin and your customer relationship are protected.

TESSCO® Platinum MasterCard

Receive deferred billing on all TESSCO purchases charged to your TESSCO® Platinum MasterCard. To learn more about many great benefits, click on **www.tessco.com/account/credit/mastercard** and mail your completed application to Business Lending Processing Center, PO Box 15973, Wilmington, DE 19885-5973.

Equipment Leasing Program

Balancing your company's cash flow can be a lot easier through leasing. Get financial flexibility and conserve bank lines for working capital, really important now for small- and medium-sized businesses. TESSCO offers a full range of leasing

options with fast turnaround time, easy documentation, competitive rates, and affordable monthly payments! Contact **410-229-1176** or **leasing@tessco.com.**

Dealer & Reseller Financing

- End-of-the-month invoicing
- Escrow agreement for major deals
- Net 60 PO financing for special projects
- Third-party financing...it's your deal, but we take the credit risk, invoice your customer, and collect.
- Third-party leasing for reseller's customers

Enhanced Credit Capacity

Grow your business with the help of your personal credit. If your business is new and your business credit is not yet established, TESSCO will extend credit to your business through your personal guarantee.

3-Payment Plan, No Interest for 90 Days

Purchase equipment with three equal payments with the TESSCO® Platinum MasterCard.

Rental

TESSCO has broad offerings of test equipment available for established customers to satisfy short-term equipment needs.

EFT (Electronic Fund Transfer)

Simply provide pertinent bank information and your transaction will be processed by fast, efficient and secure electronic payment. You can also initiate EFT by completing our brief online form.

Bank Letter Of Credit

A letter of credit from a financial institution is accepted for purchases with special conditions agreed to by all parties.

Credit Card

TESSCO accepts credit cards, including American Express, Discover Card, MasterCard, and Visa.

Contact our financing experts at ct@tessco.com or call 410-229-1395

Your Total Source®.
With Total Flexibility.

Introducing the TESSCO® Platinum MasterCard.

Imagine getting deferred billing on all your TESSCO purchases to better manage your working capital. Now you can with the TESSCO Platinum MasterCard—the latest unique financing solution from Your Total Source®. With the TESSCO MasterCard, you'll have the flexibility to extend your current 30-day payment terms an additional 25 days. Plus, make purchases on your card without impacting your open terms with TESSCO.

Apply Now!

Contact a TESSCO financing specialist at
410-229-1395
or e-mail ct@tessco.com

- No annual fee.
- 2.9% introductory APR.
- Credit line up to $100,000.
- Up to 25 days extended terms beyond TESSCO's traditional 30-day open terms.
- Make TESSCO purchases with NO effect on your open-terms credit.
- 3-payment plan with no interest for 90 days on Test and Maintenance equipment purchases.
- Enjoy the flexibility of carrying your balance beyond the card's 25 days to create instant working capital.
- Free individual cards for other employees in your organization with set individual credit lines.
- Enjoy tax benefits and simplified tax preparation by separating business and personal expenses.
- Secure, 24/7 online access.
- Program managed by MBNA America.®

bra EarBud Headset

481060

The JABRA EarBud is the most cost-effective, JABRA solution for mobile phone users wanting a hands-free alternative at a value price. The JABRA EarBud uses the patented EarGel for a secure fit and contemporary styling. Unlike the EarSet and Ear Boom solutions, the EarBud integrates the microphone as part of the cable leading from the ear to the phone. Its improved circuitry eliminates the buzz often found in lower quality solutions.

Jabra EarBud Headset

481060

The JABRA EarBud is the most cost-effective, JABRA solution for mobile phone users wanting a hands-free alternative at a value price. The JABRA EarBud uses the patented EarGel for a secure fit and contemporary styling. Unlike the EarSet and Ear Boom solutions, the EarBud integrates the microphone as part of the cable leading from the ear to the phone. Its improved circuitry eliminates the buzz often found in lower quality solutions.

435090 1 EACH	Sony Ericsson Mobile Comm. DPY901222 1 Year	Handsfree Kit engineered for superior sound quality. Reduces engine and road noise up to 75% when on a call. Also, supports voice control features, and Simple Music Mute silences the car radio when you receive a call. Professional installation required. There are two options for installation of the HCA 20. One uses a phone specific cradle and another uses a generic cradle. The generic cradle allows different phones to use the car kit without changing anything in the car. Using the phone specific cradle, the following products/accessories must be purchased to use the HCA-20. Car Holder: HCH-21 (T28, T39), HCH-27 (A2218z, A2228z, R300), HCH-22 (R380, R520m), HCH-29 (T60, T61), HCH-28(T68). System Cables: HCC-11 (T28, T39, R380, R520), HCC-12 (A2218z, A2228z, R300), HCC-20 (T60, T61, T68). As an alternate set up, the following phones can use the generic car holder (HCH 30) with the generic system cable (HCC 30) in conjunction with the HCA-20: A2218z, T28, T39, T68, R300 and R380.	130.80 2.55 1.16	87.37 86.71 86.19

ERICSSON Advanced handsfree Kit for the Ericsson T28. Features stylish design, voice-dialing, adjustable holder, full duplex mic, automatic acoustic tuning and full connectivity.

o. m	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)
V 51 H	Sony Ericsson Mobile Comm. RLC509401/02 1 Year	A microphone on a flexible gooseneck that makes it easy to access and further enhance sound quality.	25.00 1 0.45	15.98 15.86 15.77
V 96 H	Sony Ericsson Mobile Comm. DPY901323 1 Year	Car Holder that is easy to adjust to different phone models. A basic handsfree solution that keeps the phone firmly attached and close at hand for increased traffic safety. Can be connected to Advanced Car Handsfree with use of the system cable HCC-30. Quick and easy installation.	23.00 0.28 0.13	14.67 14.56 14.48
V 82 H	Sony Ericsson Mobile Comm. DPY901328 1 Year	This cable is required to attach the Advanced Car Handsfree HCA-20 with the Car Holder HCH-30. Should be installed by a qualified professional.	18.00 1 0.45	11.15 11.06 11.00
90 H	Sony Ericsson Mobile Comm. DPY901222 1 Year	Handsfree Kit engineered for superior sound quality. Reduces engine and road noise up to 75% when on a call. Also, supports voice control features, and Simple Music Mute silences the car radio when you receive a call. Professional installation required. There are two options for installation of the HCA 20. One uses a phone specific cradle and another uses a generic cradle. The generic cradle allows different phones to use the car kit without changing anything in the car. Using the phone specific cradle, the following products/accessories must be purchased to use the HCA-20. Car Holder: HCH-21 (T28, T39), HCH-27 (A2218z, A2228z, R300), HCH-22 (R380, R520m), HCH-29 (T60, T61), HCH-28(T68). System Cables: HCC-11 (T28, T39, R380, R520), HCC-12 (A2218z, A2228z, R300), HCC-20 (T60, T61, T68). As an alternate set up, the following phones can use the generic car holder (HCH 30) with the generic system cable (HCC 30) in conjunction with the HCA-20: A2218z, T28, T39, T68, R300 and R380.	130.80 2.55 1.16	87.37 86.71 86.19

sson HCA-10 Advanced Handsfree Kit

421351 481396 486382 435090

03 459191

ERICSSON Advanced handsfree Kit for the Ericsson T28. Features stylish design, voice-dialing, adjustable holder, full duplex mic, automatic acoustic tuning and full connectivity.

o. m	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)
V 51 H	Sony Ericsson Mobile Comm. RLC509401/02 1 Year	A microphone on a flexible gooseneck that makes it easy to access and further enhance sound quality.	25.00 1 0.45	15.98 15.86 15.77
V 96 H	Sony Ericsson Mobile Comm. DPY901323 1 Year	Car Holder that is easy to adjust to different phone models. A basic handsfree solution that keeps the phone firmly attached and close at hand for increased traffic safety. Can be connected to Advanced Car Handsfree with use of the system cable HCC-30. Quick and easy installation.	23.00 0.28 0.13	14.67 14.56 14.48
V 82 H	Sony Ericsson Mobile Comm. DPY901328 1 Year	This cable is required to attach the Advanced Car Handsfree HCA-20 with the Car Holder HCH-30. Should be installed by a qualified professional.	18.00 1 0.45	11.15 11.06 11.00
90 H	Sony Ericsson Mobile Comm. DPY901222 1 Year	Handsfree Kit engineered for superior sound quality. Reduces engine and road noise up to 75% when on a call. Also, supports voice control features, and Simple Music Mute silences the car radio when you receive a call. Professional installation required. There are two options for installation of the HCA 20. One uses a phone specific cradle and another uses a generic cradle. The generic cradle allows different phones to use the car kit without changing anything in the car. Using the phone specific cradle, the following products/accessories must be purchased to use the HCA-20. Car Holder: HCH-21 (T28, T39), HCH-27 (A2218z, A2228z, R300), HCH-22 (R380, R520m), HCH-29 (T60, T61), HCH-28(T68). System Cables: HCC-11 (T28, T39, R380, R520), HCC-12 (A2218z, A2228z, R300), HCC-20 (T60, T61, T68). As an alternate set up, the following phones can use the generic car holder (HCH 30) with the generic system cable (HCC 30) in conjunction with the HCA-20: A2218z, T28, T39, T68, R300 and R380.	130.80 2.55 1.16	87.37 86.71 86.19
03 H	Sony Ericsson Mobile Comm. DPY901047 1 Year	The External Handset HCE-10 lets you have private calls in your car without removing your phone from its holder. Requires the Advanced Vehicle Handsfree HCA-20 that is sold separately.	135.20 0.8 0.36	90.29 89.62 89.07
91 H	Sony Ericsson Mobile Comm. DPY901306 1 Year	Car Holder HCH-29 is a passive cradle in dark grey plastic. By placing the phone snugly into the form-fitted hollow, the phoneøs system connector is automatically fit over a connector extension. Accessories can then be attached to the phone via the holderøs base, letting you connect a PHF or CLA, for example.	26.30 1 0.45	17.55 17.41 17.31

csson Data Cables

498175

Original accessories... "from the people that made your phone(TM)." OEMs design and manufacture accessories to match the specific requirements of their phones, satisfying the most demanding customer. You can trust the high quality and performance of original accessories.

No. Jom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)
175 CH	Sony Ericsson Mobile Comm. DPY901240 One Year	The USB Cable DCU-10 is an ideal link between your mobile phone and PC. The user friendly USB standard and the high data transfer speed, makes the USB cable a perfect tool for moving data between your phone and a PC, for example when synchronizing your phone book and calendar. If your phone has a built-in modem, you can use the cable to connect to the Internet via your mobile phone, making Web and e-mail access possible from virtually any location. The USB cable also features a charger port, that lets you charge the phone while the cable is in use, ensuring that you do not run out of power. Includes CD	43.00 0.5 0.23	26.38 26.18 26.02

Digital Organizers [260-30]

csson Chatboard

453012

The Chatboard is a 49 key, snap-on keyboard that allows you to send e-mail, access SMS and the WWW, send attachments and access your phonebook. Your documents and attachments are stored in your personal homepage on the Chatboard Community Website, www.Ericsson.com/Chatboard. Just press the SMS or e-mail button on the keyboard and start typing. The Chatboard works with Ericsson T18z phone and the I 888 World phone. The Chatboard weighs less than 2 ounces. Retail Packaged.

012 CH	Sony Ericsson Mobile Comm. I/NTK10246 I Year	Send an important message to anyone in an instant using the Chatboard, an attachable keyboard for your mobile phone. Snap on the pocket sized accessory to the base of your phone, and you're ready to begin.	11.00 0.2 0.09	7.48 7.43 7.38

Mounting Plates, Cradles, Holders [150-40]

iMount

28327

The UltiMount by Pro.Fit International secures any phone or car kit in any vehicle. It swivels, rotates and adjusts to virtually any position and installs in seconds with 3M acrylic foam tape. No tools are needed. Great for cars, trucks, RV's or boats. Designed for cell phones, two- way radios, handheld GPS units and PDA's. The complete system includes a swivel belt clip, Nokia button, round and oblong buttons and surface preparation supplies. Will also work with a case with a built-in belt clip. Premium trifold clam-shell package with a color insert card and complete instructions for installing and removing.

Data Interfaces for Portable Phones [260-12]

Connectivity Kit

473084

The Connectivity Toolkit helps you manage your phone numbers (contacts) from your desktop. Use the Connectivity Toolkit to change the information in a contact including names, phone numbers, email addresses, and Internet addresses. When your changes are ready, sync them with your phone using the included data cable. The Connectivity Toolkit also has a Phone Monitor application that allows you to see your phone's display on your computer and control phone functions using the keyboard. The Connectivity Toolkit runs in, Windows 95 (OSR2 and higher), Windows 98, Windows NT and Windows 2000.

eless Solutions EarBud Headset

445052

The Wireless Soluitons EarBud is the most cost-effective, solution for mobile phone users wanting a hands-free alternative at a value price. The EarBud integrates the microphone as part of the cable leading from the ear to the phone. Its improved circuitry eliminates the buzz often found in lower quality solutions.

Data Interfaces for Portable Phones [260-12]

Data Connectivity Kit

The Connectivity Toolkit helps you manage your phone numbers (contacts) from your desktop. Use the Connectivity Toolkit to change the information in a contact including names, phone numbers, email addresses, and Internet addresses. When your changes are ready, sync them with your phone using the included data cable. The Connectivity Toolkit also has a Phone Monitor application that allows you to see your phone's display on your computer and control phone functions using the keyboard. The Connectivity Toolkit runs in, Windows 95 (OSR2 and higher), Windows 98, Windows NT and Windows 2000.
